HUMERON
Multifix Humeral Nail

Dubai, United Arab Emirates Nov 16, 2025 ([Issuewire.com](https://www.issuewire.com)) - Siora Surgical Pvt. Ltd., a veteran manufacturer and global supplier of orthopedic trauma implants, today announced the highly anticipated launch of its next-generation HUMERON Multifix [Humeral Nail](#) System. The official unveiling will take place at WHX Dubai 2026, the premier healthcare exhibition in the Middle East, where attendees can get a first look at the system at Siora's booth, HN7.A71.

This advanced nailing system is engineered to address the most complex fractures of the humerus, or upper arm bone. It provides surgeons with enhanced stability and surgical versatility, directly answering the clinical need for more reliable fixation, especially in patients with poor bone quality. The HUMERON system builds on the biomechanical principles of modern intramedullary nailing, offering a less invasive solution that promotes faster patient recovery.

"A broken shoulder is a devastating injury that can severely impact a person's quality of life. Our goal with the HUMERON nail was to create a system that not only provides a rock-solid fix but also respects the delicate anatomy of the shoulder," said a spokesperson at Siora Surgical. "This nail is a powerhouse. It offers multi-planar locking and the ability to achieve compression at the fracture site, which are critical for stability in complex breaks."

The key to the HUMERON Multifix Humeral Nail's superiority lies in its design features:

- **Multi-Planar Locking:** The system allows for the insertion of screws in multiple planes at the top of the nail, creating a robust, three-dimensional scaffold that securely captures fracture fragments and prevents rotation. This is crucial for shattered fractures of the proximal humerus.
- **Anatomical Design:** The nail is engineered for a perfect anatomical fit, preserving the crucial rotator cuff tendons during insertion and minimizing soft tissue damage.
- **Compression Capabilities:** For certain fracture patterns, the system allows the surgeon to apply controlled compression across the fracture line, promoting primary bone healing and further enhancing stability.

"As a company, we are committed to pushing the boundaries of what's possible in orthopedic trauma care," the spokesperson added. "The HUMERON system is a testament to that commitment. It's a less invasive option than traditional plating, it's biomechanically stronger by sharing the load within the bone, and it gives surgeons the advanced tools they need to tackle the toughest cases. We are incredibly proud to bring this technology to the global market at Arab Health Dubai."

Siora Surgicals has a long-standing reputation for producing high-quality, CE-certified [orthopedic implants](#) for the global market. The launch of the HUMERON system reinforces the company's position as a key innovator in the trauma sector.

All attendees, including surgeons, hospital administrators, and distribution partners, are invited to visit booth HN7.A71 at Arab Health 2026 for a live demonstration of the HUMERON Multifix Humeral Nail System.

About Siora Surgicals Pvt. Ltd.

With a legacy spanning over three decades, Siora Surgicals Pvt. Ltd. is a leading Delhi-based manufacturer and supplier of a comprehensive range of orthopedic implants and instruments. The company is dedicated to enhancing patient care worldwide by delivering innovative, reliable, and accessible trauma solutions.
