

SKINS DEBUTS AT The Running Expo 2025, SAN ANTONIO,

San Antonio, Texas Nov 13, 2025 ([IssueWire.com](https://www.issuewire.com)) - SKINS DEBUTS AT The Running Expo 2025, SAN ANTONIO, TEXAS

CHAMPIONING PERFORMANCE AND RECOVERY

Train harder. Perform better. Recover faster.

#ExcellenceUnderPressure

SKINS Compression Sportswear is proud to participate in The Running Event 2025, taking place from **3rd to 4th December 2025** at the **Henry B. González Convention Center** in San Antonio, Texas along the River Walk. As North America's premier expo for running and outdoor specialty retailers, the event offers SKINS a powerful platform to showcase its cutting-edge compression technology, connect with industry leaders, and reinforce its commitment to enhancing athletic performance and recovery. This marks an exciting opportunity for SKINS to engage with passionate professionals and demonstrate why it remains a trusted name in high-performance sportswear.

NEW PRODUCT PREVIEW IN TRE 2025 is the premium gear of our elite SERIES-5 range making a bold comeback, these SKINS tights pack our highest compression to help you move with power and precision. Built-in Proprioceptive Power Bands (PPBs) boost muscle activation and enhance body

awareness—like kinesiology tape that never quits.

SERIES-5 3D Calf Sleeves combine peak performance with standout style, offering our highest compression for targeted muscle support and faster recovery. Engineered with 3D technology to enhance movement efficiency, their vibrant stitching adds both durability and visual appeal for intense training sessions.

Designed for athletes who crave both performance and style, the **SERIES-5 3D Arm Sleeves** boast the highest compression profile. They provide targeted muscle support, enhancing both your training and recovery. Equipped with innovative 3D technology, these sleeves optimize movement efficiency, empowering you to reach new heights in your athletic pursuits.

The **SERIES-5 Knee Sleeves** are an indispensable component of protective gear for athletes. Their Proprioceptive Power Band helps maintain control during dynamic movements, allowing for swift reactions while in motion. By wrapping and stabilizing the knee, these sleeves enable athletes to engage in intensive sports activities with enhanced performance and confidence.

SERIES-3 long sleeves top, half tights, long tights and calf sleeves are designed to improve the running economy that allows athletes to run longer or faster at tempo pace. The colour-blocking and contrast stitching design seamlessly blends functionality with visual appeal, elevating the traditional look.

OUR STORY

SKINS is the pioneer of compression sportswear. Founded in Australia in 1996, we have been at the forefront of technology ever since, assisting every elite and athlete daily to achieve their personal best. Our mission is to enhance performance of every athlete in every sport in their pursuit of personal excellence.

SKINS product ranges are 100% vegan. Our products will carry the Peta Vegan certification so that the consumer can make an informed choice. We are committed to contributing to a better future. Together with our 100% recyclable packaging we are doing what is right.

PERFORMANCE VS RECOVERY

SKINS compression sportswear consists of two main categories: active sportswear and recovery sportswear, each designed to enhance athletic performance and recovery. Active sportswear is intended for use during physical activities while recovery sportswear is optimized for post-exercise use. Together, these garments support athletes not only during their workouts but also in their recovery phases, emphasizing that effective performance cannot exist without proper recovery.

WHAT MAKES SKINS UNIQUE?

- **Complex Graduated Panelling**

Apply the correct amount of pressure in the right places for targeted muscle support.

- **UV Protection Fabric**

The material of SKINS has an ultraviolet protection factor of UPF50+.

- **Moisture Management**

SKINS wicks sweat for enhanced comfort and better performance.

- **Excellent Fit**

SKINS shows originality in sizing, offering sizes based on BMI (body mass index).

- **Antimicrobial**

Inhibit the growth of bacteria that helps reduce the risk of odours, irritations and infections.

- **Reflectivity**

Reflective logo enhances safety and improves security (except Series 1).

- **Superior Construction/Durable Fabric**

Help achieve greater support, stability and stretch performance.

WHY WEAR SKINS?

BEFORE EXERCISE

Improve blood circulation and blood flow help increase skin temperature and contribute towards an optimal warm up

DURING EXERCISE

- Improve blood circulation and blood flow
- Increase movement efficiency
- Increase endurance for more power and more speed that lasts longer
- Reduce vibration and muscle oscillation for a lower risk of injury
- Reduce fatigue from impact damage
- Assist proprioception

AFTER EXERCISE

- Help speed up recovery
- Reduce the onset of Delayed Muscle Soreness (DOMS)
- Reduce markers of muscle damage
- Enhance various recovery parameters including:
 - Repeated exercise performance
 - Limb range of motion
 - Proprioceptive ability

SKINS RANGE

Explore the SKINS series – Each engineered to support your performance, recovery, and athletic goals with precision compression technology. SKINS comprises four distinct series, each developed with a specific level of compression to meet the needs of athletes at every stage, from everyday training to elite

competition.
