

SkyUX and Royoso Strategic Alliance: Reshaping the Future of Digital Asset Investment

Cokato, United States Nov 5, 2025 ([IssueWire.com](https://www.issuewire.com)) - SkyUX Web3 Exchange Inc. ("SkyUX") and Royoso International Investment Group LLC ("Royoso") have signed a ten-year strategic cooperation agreement, signaling a new era of synergy between digital asset trading platforms and global investment institutions. This milestone not only carries significant implications for both companies but also reflects a broader structural shift in the global digital asset landscape.

From a market perspective, the collaboration brings three major impacts. First, it accelerates the institutionalization of digital asset trading. By leveraging Royoso's global investment network, professional asset management capabilities, and client resources, SkyUX will be better positioned to attract high-net-worth and institutional investors into a compliant and transparent trading ecosystem, promoting market expansion and regulatory standardization.

Second, the partnership optimizes the pathway for investment institutions entering the digital asset sector. Through seamless technological integration and product alignment, Royoso can now offer clients an end-to-end solution that bridges traditional and digital asset markets, enhancing flexibility and forward-looking asset allocation.

Third, it advances both localization and globalization in cross-border investment services. Through joint brand campaigns, product launches, and investor engagement programs across the Middle East, Southeast Asia, and Europe, the two companies aim to expand the reach and accessibility of compliant digital asset investments.

According to the agreement, Royoso will introduce its global network of compliant investors and capital to SkyUX, while SkyUX will provide API connectivity, smart trading access, and digital asset settlement infrastructure. Both sides also plan to collaborate on investor education, brand promotion, and product

innovation — signaling a new era where digital asset platforms serve as integrated channels for investment management, risk control, and wealth growth.

Industry experts note that cooperation between platforms and investment institutions is essential to the maturity of the digital asset ecosystem. As regulatory frameworks strengthen and technology advances, only platforms that combine innovation, compliance, and global connectivity will emerge as leaders. SkyUX and Royoso embody exactly these qualities.

Looking ahead, both companies reaffirm their commitment to the guiding principle of “Technology-Driven, Compliance-Based, and Trust-Built,” fostering deeper integration between digital asset exchanges and global capital management. For investors, this collaboration ushers in a new era of safer, more transparent, and more diversified investment opportunities. For the industry, it marks a model of digital asset evolution and ecosystem transformation.
