

The Velvet Skin Centre, Lucknow, Introduces ENDOLIFT®: The Revolutionary Future of Non-Surgical Facelifts

The Velvet Skin Centre, Lucknow, exclusively introduces ENDOLIFT®—a revolutionary non-surgical facelift. Using advanced laser tech, it tightens & sculpts skin with no downtime. Performed by expert Dr. Asma (14+ yrs). Redefine your youth!

Lucknow, Uttar Pradesh Nov 9, 2025 ([IssueWire.com](https://www.issuewire.com)) - The Velvet Skin Centre, a premier destination for [advanced dermatology and aesthetic care in Indira Nagar](#), proudly announces the exclusive Lucknow launch of ENDOLIFT®. This groundbreaking, non-invasive laser treatment is set to redefine anti-aging, offering a surgical facelift-like outcome without the need for incisions, general anesthesia, or extended downtime.

ENDOLIFT® is a state-of-the-art, laser-based skin tightening procedure that works from within. Utilizing advanced Eufoton® laser technology, it precisely targets the deep structural layers of the skin to stimulate the body's own natural collagen and elastin production. This process results in a noticeable lift, firmer skin, and a more sculpted facial and neck contour, effectively minimizing concerns like a double chin and nasolabial folds.

"Say hello to tighter, younger, and more sculpted skin, delivered by science. We are thrilled to bring this world-class technology to Lucknow," said Dr. Asma, Lead Dermatologist with over 14 years of experience and 5,000+ patients treated. "Many patients desire the dramatic results of a facelift but are hesitant about the risks and recovery time of surgery. ENDOLIFT® bridges that gap perfectly. It's a game-changer for anyone looking to combat skin laxity with a safe, effective, and non-surgical approach."

The treatment is designed to address key signs of aging and skin laxity, including:

1. Reduced jawline definition and the appearance of a double chin
2. Sagging skin on the face and neck
3. Minimization of nasolabial folds (smile lines)
4. Skin laxity following significant weight loss

Ideal for individuals with mild to moderate sagging, ENDOLIFT® is the perfect solution for those seeking significant, natural-looking rejuvenation without going under the knife. Patients can typically resume their daily activities immediately after the brief, in-clinic procedure.

About The Velvet Skin Centre:

Located in the heart of Indira Nagar, The Velvet Skin Centre is Lucknow's trusted name for cutting-edge cosmetic and clinical dermatology. Under the expert guidance of Dr. Asma, a seasoned dermatologist with over 14 years of experience and a legacy of over 5,000 successful patient treatments, the centre is committed to delivering exceptional and personalized care.
