

TunesKit Location Changer Launches V3.0.0 with More Convenient Features

Hong Kong, Hong Kong S.A.R. Nov 5, 2025 ([IssueWire.com](https://www.issuewire.com)) - TunesKit Software, a leading provider of innovative digital solutions, is delighted to announce the official release of [TunesKit Location Changer V3.0.0](#). This latest version introduces several major updates, including **Bluetooth connectivity for iOS devices, simultaneous control of iOS and Android devices in Game Mode**, and **new language and localization support**, offering users a smoother, smarter, and more flexible location-changing experience than ever before.

"Our users asked for more flexibility across their devices - and we listened," said William Smith, Chief Product Manager at TunesKit. "With TunesKit Location Changer V3.0.0, we've reimaged the user experience by adding Bluetooth connectivity and simultaneous device control. Now, managing multiple devices and changing locations has never been easier or more efficient."

The new version not only improves usability but also expands accessibility for users across platforms and regions.

The upgraded Bluetooth connection ensures a safer and more stable gaming experience when [change location in Pokémon GO](#), Monster Hunter Now, Dragon Quest Walk, and other popular LBS games. Meanwhile, the new multi-device control feature allows users to operate both iOS and Android devices

at the same time in Game Mode - perfect for those who owns multi-OS devices. In addition, improved interface localization and the inclusion of new language support reflect TunesKit's ongoing commitment to providing a seamless experience for users around the world.

New Features in TunesKit Location Changer V3.0.0

- **Bluetooth Connectivity for iOS Devices in Game Mode:**

Users can now connect their iOS devices via Bluetooth, no need for a USB cable. This upgrade provides faster, more stable connections and greater convenience for everyday use.

- **Simultaneous Control of iOS and Android Devices in Game Mode:**

Game Mode has been enhanced to support multiple devices with different OS at once, allowing users to control both iOS and Android systems simultaneously - ideal for gamers who play across platforms or developers testing cross-device environments.

- **Japanese Interface Screenshots Added:**

TunesKit has added Japanese interface screenshots to offer a clearer and more localized experience for Japanese-speaking users.

- **Traditional Chinese Language Support:**

A new Traditional Chinese language option has been added, broadening accessibility and offering a better user experience for Chinese-speaking customers worldwide.

- **Performance Optimizations and Bug Fixes:**

The overall stability and responsiveness of the software have been significantly improved to ensure smoother performance and greater reliability.

Price and Compatibility

TunesKit Location Changer offers 5 free trials of each mode for new users. Once the free trials are used up, you can choose from several affordable plans:

- Month License: \$9.95 for up to 10 iOS or Android devices on one PC or Mac.
