

4iService Launches AI Receptionist That Handles 1000+ Calls at Once in 7000+ Languages

The Vancouver-based startup introduces a multilingual AI receptionist designed to eliminate missed calls, increase bookings, and help restaurants, hotels, and service businesses automate customer communication 24/7.

Vancouver, British Columbia Dec 4, 2025 ([Issuewire.com](https://www.issuewire.com)) - 4iService, a fast-growing AI innovation company, has officially launched its breakthrough AI-powered customer service infrastructure, designed to eliminate missed calls, boost revenue, and modernize service operations for restaurants, hotels, clinics, and real-estate companies worldwide.

At the core of this launch is **4iService Lab**, the company's advanced research unit focused on **Agentic AI**, **Autonomous Customer Experience Systems**, and **next-generation workflow automation**. The Lab is currently experimenting with innovations inspired by NVIDIA, OpenAI, and Google DeepMind including **simulation-trained AI agents**, **real-time multilingual voice intelligence**, and **zero-latency service automation**.

4iService AI systems can:

- Answer **1000+ customer calls simultaneously**
- Speak & understand **7000+ languages and dialects**
- Automate bookings, reservations & follow-ups

- Detect missed-revenue opportunities using predictive AI
- Reduce operational workload for staff
- Deliver **instant responses 24/7** with zero downtime

This marks a major shift in how businesses operate. Instead of old models based on human bottlenecks, 4iService is creating **AI infrastructure that scales like software and performs like a global service team**.

4iService Lab Building the future of intelligent operations

The Lab's mission is to "outshine the master" not by competing with Silicon Valley giants, but by innovating faster, more efficiently, and closer to real-world customer needs.

Current Lab projects include:

- **AI Receptionist v3** — autonomous reasoning + emotional tone control
- **Zero-Missed-Calls Engine** — real-time detection + re-engagement
- **AI Booking Manager** — eliminates manual follow-ups
- **Smart Workflow Routing** — AI decides who/what handles a task next
- **AI for Restaurants & Hotels** — predictive demand + guest intelligence

Our Vision

4iService aims to become the world's leading **AI service infrastructure**, enabling businesses of all sizes from small family restaurants to global hotel groups to offer reliable, multilingual, AI-driven customer experience at a fraction of current costs.

Why this matters

AI adoption is shifting from basic automation to **fully autonomous service ecosystems**. Businesses that upgrade early gain:

- Higher revenue
- Faster operations
- Better customer satisfaction
- Reduced labor pressure
- Competitive advantage

About 4iService

4iService builds advanced AI assistants that can do the work of entire service teams instantly, accurately, globally. The company trains proprietary AI systems to understand human intent, automate service tasks, and deliver perfect customer experience at scale.
