

## A New Milestone in Travel: VEV Travels Celebrates ₹15 Crore Revenue and a Growing Team of 200+ Experts

**Gurgaon, Haryana Dec 27, 2025** ([Issuewire.com](https://www.Issuewire.com)) - [VEV Travels Private Limited](#) has reached a major milestone, achieving ₹15 crore in annual revenue with a healthy 32% growth rate. In just three years, the company has grown into one of Gurgaon's fastest-rising travel service providers, backed by a team of more than 200 employees.

Founded in 2022 by CEO **Tarun Yadav** and Director **Renuka Yadav**, VEV Travels has built its growth on a clear idea: focus on trust, service quality, and strong brand partnerships rather than competing only on low prices.

During the last year, the company handled over 1 million travel bookings for customers across India and the United States. Its operations are powered by a 24/7 service model, ensuring travelers get real-time

support whenever plans change.

“Our goal was never to be the cheapest,” said [Tarun Yadav](#). “We wanted to work with brands travelers already trust and add a strong service layer that makes their journey smoother, even during unexpected situations.”

VEV Travels partners with well-known global hotel chains, car rental companies, and online travel platforms, offering customers reliable options with personal support. This approach has helped the company scale steadily while maintaining service standards.

[Renuka Yadav](#) credits the company’s people-first culture for its success. “Our team is our biggest strength. We’ve invested in skilled, multilingual professionals who understand different markets and can manage complex travel needs,” she said.

Recently, VEV Travels expanded its infrastructure with a new 75-seat BPO facility focused on US travel operations. This move supports rising demand from American travelers booking trips to India, as well as Indian travelers heading to the US.

From a small startup in 2022 to a 200+ employee organization today, VEV Travels also plans to add 50–75 new jobs in 2025. Looking ahead, the company is targeting up to 50% growth next year through continued hiring, technology upgrades, and deeper partner relationships.
