Laser Dentistry in Auburn, CA — Pier 210 Dental Group

Next-Level Care With Advanced Fotona Lightwalker Technology

Discover the future of dentistry

Laser dentistry is one of today's fastest-growing dental innovations. Pier 210 Dental Group in Auburn, CA uses the Fotona Lightwalker laser to deliver faster, gentler, and more precise care than many traditional tools. Our laser treatments are designed for improved comfort, reduced trauma, and quicker recovery.

Why Choose Laser Dentistry?

- Modern Care
- More Comfort
- Faster Healing

Laser dentistry replaces drills and scalpels with concentrated beams of light to provide smoother, more comfortable procedures. Evolving from early developments, it is now a trusted technology favored by patients and clinicians for precision and outcomes.

How Our Fotona Lightwalker Laser Works

Dual wavelengths provide versatility and precise energy delivery for many procedures.

Treats both hard and soft tissues safely and effectively.

Minimizes tissue damage to speed healing and reduce downtime.

What Can Laser Dentistry Treat?

Safe • Precise • Minimally Invasive

Gum & Oral Procedures

Gum contouring — reshape gums for a balanced smile.

Crown lengthening to expose more tooth for restorations or aesthetics.

Frenectomies — precise removal or reduction of restrictive tissue.

Periodontal therapy to reduce bacteria and promote gum health.

Biostimulation to accelerate healing and tissue repair.

Cosmetic Laser Dentistry

Laser teeth whitening for brighter smiles with gentle precision.

Gum depigmentation to address dark spots and achieve a more uniform gum tone.

Non-invasive wrinkle reduction using thermal laser energy for smoother skin.

Laser lip plumping — stimulates collagen for fuller lips without fillers.

Skin tightening around the mouth to improve firmness and reduce sagging.

Sleep Apnea Support

Our laser can gently stimulate throat tissues to help reduce airway blockage. This is a non-invasive option for patients who struggle with mild to moderate sleep apnea and want alternatives to more invasive treatments.

Cosmetic Laser Highlights

Wrinkle reduction smooths fine lines using controlled thermal energy. There are no needles and typically no downtime, providing natural-looking results.

Laser lip plumping stimulates collagen production to create fuller lips without injectables. Results are comfortable, long-lasting, and look natural.

Targeted skin tightening around the mouth helps improve texture and firmness for a refreshed appearance.

Why Patients Love Laser Dentistry at Pier 210 Dental Group

Faster treatment times

Less discomfort and swelling

Reduced need for anesthesia

Quicker recovery

More precise results

Powerful cosmetic benefits

Auburn, California Dec 6, 2025 (Issuewire.com) - [Dr. David H. Roholt](#), a respected leader in advanced restorative and minimally invasive dentistry, continues to elevate the standard of care in Northern California. As one of the **first 100 dentists worldwide to be certified in the Pinhole Surgical Technique™**, Dr. Roholt brings rare, highly specialized expertise in scalpel-free gum rejuvenation to the Auburn and Greater Sacramento communities.

With a career built on clinical excellence, Dr. Roholt has completed extensive advanced training at the **Pankey Institute** and the **Dawson Academy**, two of the most prestigious postgraduate programs for diagnosing and treating complex TMJ and bite disorders. His commitment to innovation also extends to dental research: in **2017**, he co-presented to the **International Academy of Dental Research (IADR)** on a restorative technique he developed, *"Dual Cure, Bulk Fill, Posterior Composites."* This method has contributed to more durable, long-lasting posterior restorations for patients.

[Dr. Roholt](#) is further distinguished by active membership in many of dentistry's most respected professional organizations, including the **American Dental Association, California Dental Association, Academy of General Dentistry, International Congress of Oral Implantologists, American Academy of CranioFacial Pain**, and the **American Academy of Dental Sleep Medicine**.

At his Auburn practice, David H. Roholt, DDS, Inc., patients receive comprehensive, [technology-driven dental care](#) spanning:

- Minimally Invasive Gum Surgery (Pinhole Surgical Technique™)
- TMJ Disorder Diagnosis & Treatment
- Cosmetic & Restorative Dentistry
- Dental Implants & Full-Arch Solutions
- Sedation Dentistry
- Sleep Apnea & Craniofacial Pain Therapy

"Advanced dentistry today is about precision, comfort, and minimally invasive solutions that genuinely improve quality of life," said Dr. Roholt. "My goal has always been to bring world-class techniques home to our community."

Conveniently located in Auburn, CA, Dr. Roholt's practice continues to serve patients seeking expert-level care backed by decades of experience, scientific contribution, and international recognition.
