

Language Localization Platform to Transform How Enterprises Communicate with Customers Worldwide

Pune, Maharashtra Dec 2, 2025 ([IssueWire.com](https://www.issuewire.com)) - **Sakshi Softech Pvt Ltd.** announced the launch of its breakthrough **AI-powered Language Localization Solution**, a platform designed to help enterprises deliver seamless, multilingual customer experiences without changing their existing code or applications.

Built for high-growth industries such as BFSI, Insurance, Fintech, Aviation, Retail, and Government, the solution enables organizations to instantly localize **applications, documents, and customer communications** into 200+ global languages including RTL languages such as Arabic and Urdu.

A Game-Changer in Enterprise Localization

Traditional localization often requires heavy development effort, complex integration, and long project cycles.

Sakshi Softech eliminates all of that.

Key innovations include:

- **Zero Code Changes:** Organizations can enable multilingual capabilities without modifying existing applications.
- **Instant Language Switching:** Users can switch languages on any application with a single click.
- **Document Translation at Scale:** Convert letters, PDFs, agreements, policies, and regulatory documents within seconds - while preserving layout and formatting.
- **Industry-Ready Accuracy:** Localized date formats, currencies, compliance terminology, and domain-specific vocabulary ensure high-fidelity output.
- **Enterprise Security:** All translations happen in a secure, controlled environment with no data exposure.

Designed for Industries That Serve Millions

The platform addresses localization challenges across multiple enterprise sectors:

Banking & NBFCs

Localized onboarding journeys, loan letters, statements, KFS documents, and mobile banking apps - instantly and accurately.

Insurance

Policies, claim letters, endorsements, compliance documents, and customer portals translated in minutes.

Fintech

Multilingual payment flows, onboarding apps, dashboards, and transactional messages.

Aviation

Localized booking engines, mobile apps, passenger communication, safety instructions, and operational manuals.

Retail & E-Commerce

End-to-end multilingual UI, product catalogs, invoices, and customer support messaging.

A Milestone for Global Expansion

With a growing demand for hyper-local customer experiences, Sakshi Softech Pvt Ltd. aims to empower enterprises to scale globally - without increasing development, translation, or operational cost.

The company is already in discussions with major BFSI and Fintech organizations to deploy the platform across customer-facing and internal systems.

About Sakshi Softech Pvt Ltd.

Sakshi Softech Private Limited is a leading software product company headquartered in Pune, India. With over a decade of proven expertise, we specialize in advanced Language Localization and Multilingual Automation Solutions that help enterprises overcome language barriers, ensure compliance, and connect seamlessly with customers across India and global markets.

Our portfolio includes next-generation Language Localization Platforms and Tools that empower enterprises to translate, adapt, and automate their websites, software applications, digital interfaces, and business documents into 200+ global and Indian languages without any code changes. From UI and application localization to document automation and multilingual reporting, we act as strategic partners in helping organizations globalize their operations, meet regulatory mandates, and engage customers in their preferred languages.
