

# Lithosphere Enhances Ecosystem Intelligence Tools to Support Builder Growth and Network Adoption

Upgraded intelligence framework improves visibility, alignment, and scalability across the Lithosphere ecosystem

**London, United Kingdom Dec 24, 2025** ([Issuewire.com](https://www.issuewire.com)) - [Lithosphere](https://lithosphere.network) (LITHO), an AI-powered blockchain ecosystem focused on interoperability and automation, announced enhancements to its ecosystem intelligence tools aimed at supporting builder growth and accelerating network adoption. The latest improvements strengthen how projects are surfaced, understood, and integrated within the Lithosphere network, creating a more navigable and developer-friendly environment.

The enhanced ecosystem intelligence framework is designed to provide clearer context around projects operating within Lithosphere. By improving how applications, services, and tools are organized and discovered, the platform enables builders to gain visibility while helping users better understand ecosystem activity. These updates reduce friction across decentralized discovery and promote more efficient interaction between builders and the broader community.

Lithosphere's intelligence tools are closely integrated with its automated infrastructure, allowing ecosystem data to support onboarding, discovery, and long-term growth. Builders benefit from improved alignment with network standards and tooling, while participants gain more transparent access to decentralized innovation. This approach reinforces Lithosphere's objective of simplifying multichain ecosystems through AI-driven automation and insight.

"Ecosystem intelligence is essential for sustainable network growth," said [J. King Kasr](#), Chief Scientist

at KaJ Labs. “By enhancing these tools, Lithosphere is giving builders and participants the clarity needed to navigate, connect, and scale within a decentralized environment.”

The continued expansion of ecosystem intelligence capabilities reflects Lithosphere’s broader roadmap to deliver scalable, AI-enhanced infrastructure that supports adoption, experimentation, and innovation across decentralized networks.

### About Lithosphere

Lithosphere is an AI-driven blockchain platform designed to enable scalable cross-chain applications and decentralized ecosystems. Integrating deep learning technology with decentralized infrastructure, Lithosphere provides automated tools and standards that empower developers, communities, and multichain innovation. The LITHO token supports network operations, governance, and ecosystem participation.
