

Lithosphere (LITHO) Expands Ignite Launchpad to Accelerate Ecosystem Discovery and Project Onboarding

Enhanced launchpad capabilities strengthen visibility, access, and scalability across the Lithosphere ecosystem

Seattle, Washington Dec 22, 2025 ([Issuewire.com](https://www.issuewire.com)) - [Lithosphere](#) (LITHO), an AI-powered blockchain ecosystem focused on interoperability and automation, today announced the expansion of its Ignite launchpad to further accelerate ecosystem discovery and streamline project onboarding. The expanded Ignite framework is designed to improve how blockchain projects enter, integrate, and grow within the Lithosphere network while maintaining a structured and accessible environment for ecosystem participants.

Ignite serves as an automated entry point for projects seeking alignment with Lithosphere's multichain infrastructure. Through enhanced onboarding workflows, the launchpad simplifies early-stage integration while reducing friction commonly associated with launching within decentralized ecosystems. These improvements enable builders to focus on development while gaining access to ecosystem tools, standards, and exposure from the outset.

The expanded Ignite launchpad also strengthens ecosystem discovery by improving how projects are surfaced and navigated within the network. By organizing initiatives more effectively and supporting transparent access, Ignite helps users explore applications, services, and tools across multiple blockchain verticals, including DeFi, NFTs, gaming, and infrastructure. This approach reinforces Lithosphere's objective of making multichain ecosystems more navigable and scalable.

“Ignite is evolving into a foundational layer for ecosystem growth,” said [J. King Kasr](#), Chief Scientist at KaJ Labs. “By expanding onboarding and discovery capabilities, Lithosphere is creating a more efficient pathway for innovation to emerge and connect across the network.”

The expansion of Ignite reflects Lithosphere’s ongoing commitment to AI-enhanced infrastructure that supports long-term ecosystem development while simplifying interaction across decentralized networks.

About Lithosphere

Lithosphere is an AI-driven blockchain platform designed to enable scalable cross-chain applications and ecosystem interoperability. Integrating deep learning technology with decentralized infrastructure, Lithosphere provides automated tools and standards that empower developers, communities, and multichain innovation. The LITHO token supports network operations, governance, and ecosystem participation.
