

Mission Road Animal Clinic Elevates Pet Health with Comprehensive, Rapid Diagnostic Care in Prairie Village

Mission Road Animal Clinic in Prairie Village, KS, is dedicated to rapid and accurate pet healthcare through advanced diagnostic care services.

MISSION ROAD ANIMAL CLINIC

Prairie Village, Kansas Dec 5, 2025 ([Issuewire.com](https://www.issuewire.com)) - Mission Road Animal Clinic, a trusted provider of pet care in Prairie Village, today announced its dedication to offering the most advanced and comprehensive pet diagnostic care available. In veterinary medicine, being able to diagnose conditions quickly and accurately is crucial for successful treatment. Since pets often hide signs of illness or

discomfort, the diagnostic tools at the practice are essential for veterinarians to look beyond the surface and determine the exact cause of the problem.

The clinic's diagnostic care program combines sophisticated technology with expert interpretation. Key features include digital radiography (X-rays), which produce immediate, high-resolution images essential for evaluating everything from broken bones and arthritis to internal organ health and foreign body ingestion. The clinic also operates a powerful in-house laboratory, allowing the team to perform tests like complete blood counts, urinalysis, and chemistry panels on-site. This speed is crucial, enabling veterinarians to begin life-saving treatments or surgical preparations within minutes, without waiting for external lab results.

The effectiveness of these diagnostic tools is enhanced by the clinic's dedicated medical staff, including Dr. Gib Benschoter. Dr. Benschoter is an integral part of the team, guiding complex diagnostic evaluations and treatment plans. His focus ensures that every pet's diagnostic journey is handled with precision and care. Pet owners consistently trust the team at the hospital to not only care for their pets but also use all available resources to uncover the most accurate health picture. This provides real answers and improves the quality of life.
