

Soundwave Music Group makes its entrance into the music industry.

\$OUNDWAVE MUSIC GROUP

Willingboro, New Jersey Dec 30, 2025 ([IssueWire.com](https://www.IssueWire.com)) - Soundwave Music Group (commonly known as \$MG), an multinational music corporation and record label conglomerate founded by Yøung.Prødigy, today announces its continued expansion and public-facing growth following the official launch of its social media presence in 2025.

Founded in 2022 and headquartered in New Jersey, Soundwave Music Group has spent several years operating behind the scenes, supporting independent artists and labels through a structured yet artist-first ecosystem. Owned by The BMCA, with shares held by El-Amin Enterprises and Money Made Dues Paid, LLC, \$MG has steadily built a diverse and global catalog while remaining focused on long-term creative sustainability.

In 2025, \$MG entered a new chapter by publicly launching its platforms beginning with Mate Nation, signaling increased transparency, accessibility, and direct engagement with independent artists and labels worldwide.

Soundwave Music Group manages a broad portfolio of labels, including flagship imprints such as GTB Entertainment, Mate Nation, Ice Cream Music Records, and DOLLAR\$ RECORD\$, alongside an extensive core division that supports a wide range of genres, cultures, and creative movements.

What distinguishes \$MG within the modern music landscape is its artist first philosophy. The corporation provides independent artists with the opportunity to release music through professional labels while

retaining their independence. Unlike many traditional systems, \$MG evaluates artists based on talent, originality, and uniqueness rather than popularity metrics, and its labels actively accept demos from emerging creators.

A defining pillar of \$MG's mission is its commitment to preserving human creativity in music. The company is actively working to reduce AI-generated content across its ecosystem, citing concerns over artistic integrity and the long-term impact of artificial music on the industry. \$MG positions itself as a strong advocate for real artists, real stories, and real creative expression.

With a vast catalog exceeding a million streams on Spotify, \$oundwave Music Group continues to establish itself as a forward-thinking global music corporation designed for the independent era.

As the company moves forward, \$MG aims to redefine the relationship between artists and labels, building a future where independence and professional support coexist without compromise.
