

ReAction Unaffected by 2026 Hemp Law; Patented Tech and Vertical Integration Position Company as Industry Leader

ReAction Confirms It Is Unaffected by 2026 Hemp Legislation; Poised to Lead Industry With its Patented Technology and Processes.

Mooreville, North Carolina Dec 16, 2025 ([Issuewire.com](https://www.issuewire.com)) - ReAction® today announced that it remains **fully compliant and completely unaffected** by the federal hemp regulatory changes set to take effect in 2026. While recent legislation will drastically tighten the legal definition of hemp and effectively render **an estimated 95% of current CBD and hemp-derived products illegal under federal law**, ReAction®'s patented technologies and fully controlled production model were built to exceed these standards.

Adding to the newsworthiness, **President Donald Trump recently suggested that Medicare should consider covering CBD-based therapies**, igniting a national conversation about how cannabinoid-based wellness products fit into mainstream healthcare and accelerating public interest in compliant, medically relevant hemp extracts.

Patented, Chemical-Free Technology Sets ReAction Apart

ReAction cultivates all hemp using a **patented system, creating a sterile, closed environment aeroponic cultivation process** (no dirt) that ensures clean, consistent, and naturally pure plants. ReAction®'s patented, proprietary **Cryosonic™ extraction** uses precision sound waves—**not chemicals or heat**—to produce an exceptionally pure, chemical-free extract known as **Full Cryosonic™ Extract**, or **FCE™**, which includes all 600+ known compounds found in the hemp plant,

and is aligned to exceed tightening federal rules.

Vertically Integrated & ISO Certified

ReAction® is **vertically integrated**, with every step—cultivation, extraction, formulation, and bottling—done **in-house** within ReAction®'s **ISO-certified facilities**, ensuring complete traceability, quality control, and regulatory stability.

Company Statement

“ReAction® was built for this exact moment,” said JD Phillips, Director of Business Development. “As federal policy shifts and public interest in cannabinoid-based therapies grows, our patented technology and vertically integrated operations position us to confidently lead the next generation of compliant hemp wellness products.”
