

# Renter? Suspect MOLD? Need Help? Get Immediate Results Here

**Having a tough time with cold type symptoms and renting from a Landlord? We are your solution!**

**Pensacola, Florida Dec 18, 2025 ([IssueWire.com](http://IssueWire.com))** - Do you rent? Are you a tenant and have mold? Let me guess...the Landlord won't help? That's about to change, Fast!

As a 23 year specialist, Christopher P. McCormick a national leading expert in microbial growth, inspections, and remediation, and with years of background in building construction, he is committed to leading the country with this national health concern. With an abundance of experience and documentation his goal is to show the current building code allows and encourages moisture absorption, and in turn creates mold in properties all over America

With one call to the Florida State Mold Inspectors office at 850.332.2900, our New mold developments and procedures will get the help to consumers and renters that has been needed for a long time

Commonly HVAC systems produce cold, moist air that traps moisture is in the ductwork, allowing microbial growth to take place. Currently building code changes are being addressed due to the ongoing issue.

With a visual inspection and report you can now Mandate your Landlord to do something or terminate the lease with our inspection License, evoking state law. The landlord will be Ordered to fix it correctly and in 7 days by a licensed mold remediator or you have the right to terminate the lease and move if the situation is not corrected. More information on this can be found online at <https://www.FLstateMoldInspector.com> and <https://www.FloridaMoldRemovalServiceGroup.com>

Book immediately! Guaranteed for Florida residents renting, or you receive \$500. Call or text 448.250.5916 to start and resolve your issues. Our track record is proven and 100% successful.
