

Sacramento Aesthetic Surgery Introduces the High Extended SMAS Facelift for Natural, Long-Lasting Rejuvenation

Discover the advanced facelift technique redefining facial rejuvenation through unparalleled natural results with longevity, crafted by less than 1% of global experts, and experience elevated confidence and satisfaction for over 15 years.

Sacramento, California Dec 4, 2025 ([Issuewire.com](https://www.issuewire.com)) - Sacramento Aesthetic Surgery proudly announces the introduction of its specialized facelift procedure, the High Extended SMAS Facelift, a state-of-the-art technique performed by less than 1% of facelift surgeons worldwide and is consistently considered the top [facelift surgeon in North Sacramento](#). Under the elite expertise of Dr. Donald Hause, this advanced procedure aims to deliver extraordinarily natural results, enhancing patient self-confidence and life satisfaction through longer-lasting rejuvenation outcomes.

The High Extended SMAS Facelift represents the pinnacle of surgical artistry and technical innovation, targeting the deeper muscular layers of the face rather than merely tightening the skin. This advanced approach allows Dr. Hause to reposition foundational facial structures, such as muscles and fat, resulting in a naturally youthful appearance that remains effective long beyond the more traditional facelift methods. The meticulous precision of this technique not only ensures aesthetic superiority but also contributes to notable longevity, with patients typically experiencing enduring outcomes for over 15 years.

Modern innovations in cosmetic surgery require a profound understanding of the complex interplay of facial structures. The precision of the High Extended SMAS Facelift arises from addressing the deeper anatomical layers, effectively solving longstanding issues of facial aging where traditional methods fall short. This differentiation allows for a more nuanced correction of issues such as sagging cheeks, jowls, and poor neck contour, offering comprehensive rejuvenation that minimizes the "over-operated" look associated with older techniques.

"As a teacher, mechanic, and coach, my goal with every patient is to guide them through a journey that not only enhances their physical appearance but also substantially boosts their self-esteem," stated Dr. Donald Hause, Board-Certified Plastic Surgeon at [Sacramento Aesthetic Surgery](#). "With the High Extended SMAS Facelift, we deliver results that look not only natural but also transformative, reaffirming our commitment to fostering greater quality of life for our patients."

At the core of Sacramento Aesthetic Surgery's mission is the ethos of "Enhancing Your Life," aiming to increase patient satisfaction and well-being through innovative, customized, and holistic aesthetic solutions. The practice is strategically focused on delivering masterful precision and care, aligning advanced surgical techniques with patients' individual aesthetic goals to achieve naturally beautiful outcomes.

Expertise, artistic precision, and commitment to patient-centered care are the hallmarks of Dr. Hause's practice. The High Extended SMAS Facelift's effectiveness is rooted in the surgeon's mastery of facial anatomy, offering a blend of science and art that is unrivaled in the field. This technique allows the creation of subtle yet impactful changes, maintaining the patient's inherent beauty while redefining youthful contours and restoring confidence.

"Our ultimate aim is to provide procedures that not only meet but surpass the expectations of our patients, ensuring they enjoy significant improvements in both appearance and self-assurance," added Dr. Hause. "By integrating this high-level expertise into our practice, Sacramento Aesthetic Surgery remains committed to leading the way in delivering unparalleled rejuvenation solutions."
