

## VIP Designs Becomes Australia's First Certified Installer of BASWA Phon Seamless Acoustic Plaster

VIP Designs is now Australia's first BASWA Phon certified installer, offering premium seamless acoustic plaster solutions that combine exceptional sound absorption with a flawless architectural finish.

**Perth, Western Australia Dec 2, 2025** ([Issuewire.com](https://www.issuewire.com)) - VIP Designs, a leading provider of acoustic and interior solutions, proudly announces its certification as Australia's first BASWA Phon seamless acoustic plaster system installer. This certification positions them at the forefront of innovative acoustic

solutions for commercial and residential projects across Australia.

BASWA Phon is a premium Swiss-engineered system that delivers a smooth, seamless finish while providing exceptional sound absorption. Unlike traditional acoustic ceilings, BASWA Phon can be applied to flat surfaces, domes, vaults, or complex curves, creating an elegant, monolithic aesthetic while improving room acoustics by reducing excessive noise and reverberation.

As a certified installer, they ensure every BASWA Phon project meets the highest standards for installation and acoustic performance. BASWA products are sustainably designed to suit any architectural style.

With this certification, architects, designers, and property owners in Australia can now access professional installation of [BASWA Phon](#) without compromising on aesthetics or sound quality. VIP designs ensures your residential and commercial interior is completed with precision, safety, and outstanding quality.

### **About VIP Designs**

VIP Designs provides expert, custom-designed installations of seamless acoustic plaster for ceilings and walls across Australia. As certified installers of premium systems like BASWA Phon, VIP Designs collaborates closely with architects and designers to deliver high-performance solutions. They create commercial and residential spaces that feel perfectly calm, balanced, and beautifully quiet.
