

What Happens When Your Phone, Car and Power Grid Stop Forever? Sharlane Thuma's New Release, Haven The Series, Answers

Beverly Hills, California Dec 15, 2025 (Issuewire.com) - Ever spent a day without your phone and felt completely lost? Now, imagine a world where nothing with a battery or power cord works—not your

car, not the internet, not the heating, not ever again. That chilling reality is the starting point for Sharlane Thuma's gripping new dystopian series, *Haven The Series*. This isn't your average slow-burn apocalypse; this is the world's most terrifying power outage, and humanity has instantly regressed to the 17th century.

Thuma invites readers into the immediate aftermath of a global war in 2055, where new weapons wiped out all electronics. It's a raw, immediate fight for survival where the biggest threat isn't just hunger, it's the human capacity for cruelty.

About the Book

Haven The Series throws you straight into the deep end of the impossible. It's the Summer of 2055, and as the author states, the world has "gone insane." The sudden, universal failure of technology meant civilization didn't collapse—it was instantly hurled back 400 years.

The heart of the story belongs to Marc and Sienna. After a devastating year of fighting, losing loved ones, and watching their community become overrun with bandits "determined to take what they could," they make the hardest choice a parent can make: pack up and flee. Their goal is a desperate, year-long trek East to find a new beginning and establish a secure place they call "The Haven."

The narrative is a powerful mix of gritty survivalism and deep family drama. You'll follow the Hammers family—including their children and their newly blended family—as they learn to navigate a world where they must rely on old knowledge, simple tools, and sheer grit. The dangers are relentless, from securing food and water to facing down desperate, lawless individuals. The author masterfully shows how quickly societal norms dissolve when there is no police, no government, and no digital connection left.

The first book culminates with the family's triumphant, emotional arrival. After enduring months of grueling travel, enduring the "tiny terrors" (the kids!) and avoiding bandits, they finally reach "Home"—a place of lush grass, huge buildings, and amazing corrals— a true beacon of hope and resilience built on the back of faith and fierce family unity. *Haven The Series* is a potent reminder that when everything is stripped away, family is all that remains.

About the Author

Sharlane Thuma is a gifted storyteller who explores the deepest vulnerabilities and greatest strengths of the human spirit. With *Haven The Series*, Thuma blends a passion for realistic survival narratives with a profound curiosity about societal collapse. Her work serves as a subtle yet powerful piece of social commentary, asking readers to consider what they would truly retain if their digital crutches were removed forever. Thuma's writing challenges the modern reader's over-reliance on technology, making the impossible scenario of the year 2055 feel terrifyingly real. Sharlane Thuma continues to be inspired by stories of resilience and the enduring power of family.

Availability

Haven The Series, published by Twain Book Writers, is the essential new read for fans of dystopian and hard sci-fi. The first book is available now on Amazon and all major book retailers.
