

3 on 6 Dental Implants in Las Vegas: Personalized Full-Arch Implant Care at All Out Dental

ALL OUT
DENTAL

Las Vegas, Nevada Jan 24, 2026 ([IssueWire.com](https://www.issuewire.com)) - All Out Dental in Las Vegas offers 3 on 6 dental implants as a fixed full-arch solution for patients seeking an alternative to removable dentures or the All on 4. Through individualized treatment planning, advanced imaging, and patient-focused care, the clinic provides implant-supported restorations designed to support comfort, stability, and long-term oral health.

Serving patients throughout Las Vegas and surrounding communities, [All Out Dental](#) emphasizes education, transparency, and realistic expectations at every stage of treatment.

A Patient-Centered Approach to Full-Arch Implant Care

All Out Dental develops treatment plans based on each patient's unique anatomy, oral health condition, and functional needs. Digital imaging and clinical evaluation are used to guide implant placement and prosthetic design.

"Full-arch implant treatment requires careful planning and customization," the team explains. "Our goal is to help patients understand their options while designing care that supports both appearance and function."

This approach allows patients to make informed decisions without unrealistic promises or guarantees.

Care Led by a Dentist With Advanced Implant Training

All Out Dental is led by **Dr. Jason Emett**, a dentist with advanced training in the 3 on 6 implant model for full-arch rehabilitation. Dr. Emett is a graduate of the UNLV School of Dental Medicine and is an authorized 3 on 6 provider in Las Vegas, NV.. He also serves as an educator at the Colorado Surgical Institute, where he helps train dental professionals in advanced surgical techniques.

Dr. Emett focuses on digital planning, patient education, and comfort-focused care, even for individuals who experience dental anxiety.

What 3 on 6 Dental Implants Involve

The 3 on 6 dental implant technique uses:

- **Six dental implants**
- To support **three separate fixed bridges**
- Replacing a full arch of teeth
- Keep your gums!

This structure allows chewing forces to be distributed across multiple implant points. Candidacy is determined through professional evaluation of bone health, gum condition, and overall oral health.

The 3 on 6 Treatment Process **Consultation and Imaging**

Digital scans and X-rays are used to evaluate bone structure, gum health, and bite alignment.

Treatment Planning

Implant positions are digitally mapped to support stability and balanced bite function.

Implant Placement

Six implants are placed using guided surgical techniques to support accurate positioning.

Healing Phase

The implants integrate with the jawbone during osseointegration.

Final Bridge Placement

Three custom bridges are attached and adjusted for comfort, fit, and bite balance.

Patients receive ongoing care guidance and follow-up visits to support long-term implant health.

Technology That Supports Precision

All Out Dental utilizes:

- 3D cone-beam imaging
- Digital treatment planning
- Intraoral scanning
- Advanced sterilization protocols

These tools help improve diagnostic accuracy and treatment predictability.

A Comfortable and Supportive Environment

The clinic is designed to support patient comfort and reduce anxiety. The dental team explains each step of care clearly and encourages questions throughout the process.

Flexible scheduling and transparent communication help patients feel informed and confident.

Serving the Las Vegas Community

Patients from across Las Vegas and nearby areas visit All Out Dental for implant-supported full-arch care. Many patients are referred through word-of-mouth from friends, family, and healthcare providers.

The clinic remains committed to evidence-based dentistry and long-term oral health support.

Scheduling a Consultation

Patients interested in learning more about 3 on 6 dental implants may schedule a consultation to determine whether this treatment option is appropriate for their individual needs.
