

Acquisition of Shiftpixy by G3 Business Services LLC

G3 Enters Contingent Staffing Domain with Strategic Bankruptcy Acquisition

Miami, Florida Jan 31, 2026 ([Issuewire.com](https://www.issuewire.com)) - Acquisition of Shiftpixy by G3 Business Services LLC ("G3")

G3 has entered the contingent staffing domain with the successful acquisition of ShiftPixy, accelerating its strategy to become a scalable, multi-state staffing platform. Since its incorporation, G3 had been actively evaluating acquisition opportunities that aligned with its long-term growth objectives. This opportunity was identified through a bankruptcy court publication, prompting swift action by the leadership team to raise capital, participate in a competitive bankruptcy auction, and ultimately secure the winning bid.

The founding partners and leadership team brings over 50 years of combined experience across staffing operations, mergers and acquisitions, and federal and state government contracting and bid processes. Building on this foundation, management has three prospective acquisitions identified for execution over the next two to three years, with a focus on expanding the staffing platform across multiple states.

In parallel, organic growth across staffing verticals will be driven through client expansion, operational efficiencies, and disciplined execution, supporting financial stabilization and positioning the platform for long-term market leadership.

ShiftPixy's company strategy is to create a technology driven national staffing platform that addresses inefficiencies in the labor market. It connects flexible workers with employers using AI, automation, and real-time workforce intelligence.

With this latest AI enablement, the company is transforming the way traditional staffing is delivered with a digital, data-rich human capital system which integrates an HCM tech stack, ensuring fast filling of positions via its proprietary Ai Chatbot. The platform improves workforce quality for clients catering to high volume industries like hospitality, logistics, IT Software, etc.

ShiftPixy plans to leverage long-term small and medium-sized business relationships and national accounts to grow an on-demand talent marketplace. The management team's experience in staffing, technology, and M&A supports a strategy that enhances profit margins through operational efficiencies, shared services, automation, and reduced SG&A costs. The application also tracks and monitors the real-time analytics, workforce mapping and on-demand interview tools, aiding clients in making quicker, faster and data driven staffing needs.

This improves productivity and retention while providing workers with flexibility, access to benefits, and meaningful income opportunities. Shiftpixy, is poised to become the staffing industry's first AI Powered digital staffing partner for meeting dynamic workforce requirements by offering instant and on-demand staffing deployment coupled with high value growth.

To summarize, Shiftpixy aims to be the central platform for M&A staffing by integrating regional providers and supplying a talented workforce on its platform with cutting edge employee monitoring tools.
