

Albany City School District Enhances Campus Safety with LINEV Systems BV5030 Scanners

Featuring A-EYE® and Vape Detection Technology

Conroe, Texas Jan 9, 2026 ([Issuewire.com](https://www.issuewire.com)) - Albany City School District (New York State) has announced the installation of advanced [LINEV Systems BV 5030 backpack scanners](#), equipped with A-EYE® artificial intelligence and Vape Detection, as part of its ongoing commitment to creating a safer learning environment for students and staff.

The [BV 5030 systems](#) represent a new era of intelligent security screening for educational campuses. Utilizing A-EYE®, LINEV's proprietary AI-driven image analysis platform, the scanners can automatically detect threats, contraband, and prohibited items with high accuracy and efficient performance while also reducing operator fatigue.

The installation of the BV 5030 scanners aligns with Albany City School District's broader security strategy that prioritizes preventative measures and innovative technology over reactive solutions.

"LINEV weapons detection systems give school security teams a critical edge," said Paul Rivello,

Director of Sales at [LINEV Systems US](#). “By combining intelligent automation with proven imaging technology, the BV 5030 helps schools maintain a safe atmosphere while ensuring students’ privacy and dignity.”

The BV 5030’s compact design and reliable performance make it ideal for school environments where large numbers of backpacks and bags must be screened efficiently. With a user-friendly interface and automatic alerting, the system supports a safe and positive campus flow.

Albany City School District joins neighboring Schenectady City School District in acquiring LINEV Systems' weapons detection technology. Scanners were implemented on December 10.

About LINEV Systems

Founded in 2006, [LINEV Systems US](#), Inc. is a leading provider of advanced security solutions, specializing in cutting-edge technology for detecting weapons and contraband in high-risk environments. With a focus on the education sector, as well as correctional facilities and other critical infrastructure, LINEV’s products are designed to enhance safety without disrupting daily operations. By using AI and imaging technologies, LINEV Systems delivers reliable, real-time threat detection systems for schools, prisons, borders, airports, and other security-sensitive infrastructure.
