AutoCount Accounting Software: Making Malaysia e-Invoice Easy for SMEs

Agile X Solution updates the AutoCount System to handle LHDN rules automatically. We make e-Invoicing simple, fast, and stress-free for your business.

Kuala Lumpur, Malaysia Jan 18, 2026 (Issuewire.com**)** - AutoCount has launched a new "Easy e-Invoice" setup for the **Accounting** software in Malaysia. We understand that Malaysian business owners are confused by the new LHDN tax rules. Our goal is simple: we make the AutoCount System do the hard work for you.

While other software can be complicated, our updated AutoCount setup automates the entire process. You do not need to be a tax expert to use it.

e-Invoice Made Simple "We made Malaysia e-Invoice easy," says Jack Goh, Founder of Agile X Solution. "With our setup, you just create an invoice like normal, and the **AutoCount System** automatically sends it to LHDN. There are no extra steps and no headaches. It is just one click."

How We Make It Easy:

- **Automatic Sending:** The software talks to LHDN directly. You don't have to upload files manually.

- **Error Prevention:** The system blocks mistakes before they happen, so you don't get fined.

- **Simple Training:** We teach your staff in plain English, not technical jargon.

About Agile X Solution Sdn Bhd We are the **AutoCount** experts who believe accounting should be simple. We help Malaysian SMEs upgrade their systems to be compliant without the stress.
