Brandmydispo Announces Expansion of Custom Mylar Bag Capabilities

Brandmydispo, a custom packaging manufacturer focused on printed Mylar bags and flexible packaging, has expanded its operations to accommodate growing demand for customized, compliant flexible packaging and container solutions.

Tulsa, Oklahoma Jan 25, 2026 (Issuewire.com**)** - Brandmydispo's capacity to produce various custom Mylar bags has increased with this expansion. Brandmydispo will now offer custom Mylar bags in every style, including: zipper-seal pouches, child-resistant bags, and stand-up packs. The company

has grown steadily due to the increasing number of brands looking for ways to improve their product's visibility on the shelf while providing excellent barrier protection.

Brandmydispo has also increased its operational efficiency for its printing and finishing processes, resulting in higher quality prints with more precise color accuracy, glossy and matte coatings, or other specialty print effects and materials engineered to preserve the product for longer periods of time.

In addition to supporting small businesses by offering very low minimum order quantities, Brandmydispo also offers free artwork assistance and dedicated customer service throughout the entire printing and custom packaging development process.

Brandmydispo continues to provide support to its branded customers by providing free design support for their products, offering flexible minimum quantity orders and working with the customer throughout their packaging process. These services are designed to help both new businesses and established brands launch their products in an efficient manner.

With its expansion, Brandmydispo will be positioned to continue providing services to customers across the country with a focus on consistent quality, customizable products, and scalable manufacturing capabilities.
