

# Curantis Solutions and WorldView Partner to Bring Faster, Clearer Workflows to Hospice and Palliative Care Teams

**Addison, Texas Jan 27, 2026** ([IssueWire.com](https://www.issuewire.com)) - Curantis Solutions, a care-driven hospice and palliative care EHR platform, and WorldView, a document and workflow management system used by home health and hospice agencies nationwide, today announced a new integration designed to simplify daily operations and improve care delivery for end-of-life providers.

Together, the companies combine Curantis' intuitive clinical and billing workflows with WorldView's real-time visibility, order management, and document automation, giving hospice and palliative care organizations a more connected, less manual way to manage referrals, orders, and clinical documentation.

*"This partnership is about outcomes that staff can feel the moment they start using it,"* said Bob Dean, CEO of WorldView. *"Curantis brings a modern, hospice-specific EMR, and WorldView brings clarity and automation to every order and document. Together, agencies reduce delays, cut down on errors, and free clinicians to focus their time on patient care, not paperwork."*

The integration links Curantis and WorldView so agencies can manage referrals, orders, and supporting documents without switching systems or relying on faxes, email attachments, or manual follow-ups.

Real-world data from organizations using WorldView demonstrate the tangible outcomes:

- 85–90% of physician orders signed within 7 days (as fast as 3 days with e-sign)
  - Up to 90% reduction in referral and document processing time
  - **80% reduction** in medical record request time
  - Faster onboarding (from 48 hours to under 24 hours)
  - Fewer unsigned orders and documentation gaps
  - Faster orders leading to quicker billing cycles and more predictable cash flow

"As we begin using Curantis and WorldView together, we're incredibly optimistic about what's ahead," said Bob Wallace, CEO of Life's Journey. "Reducing delays, tightening documentation follow-through, and simplifying back-and-forth workflows is exactly where hospice technology needs to go."

"Hospices today face mounting regulatory pressure, staffing shortages, financial constraints, and documentation demands that never slow down," said John Carreker, CEO & Founder of Curantis Solutions. "Our integration with WorldView is a meaningful step toward lightening that load and helping care teams deliver exceptional end-of-life care."

## Availability:

The Curantis + WorldView integration is available to hospice and palliative care agencies beginning today. Current customers of both platforms can contact their account representatives to begin implementation.

## About Curantis Solutions:

Curantis Solutions delivers powerful, care-driven hospice & palliative care software, thoughtfully built to put clinicians back at the bedside. Curantis Solutions streamlines documentation, strengthens

interdisciplinary coordination, and simplifies billing so teams can focus on delivering exceptional end-of-life care. The Curantis platform simplifies work that slows teams down and supports confident, compliant hospice operations for agencies of every size.

#### About WorldView:

WorldView gives home health and hospice agencies complete visibility and control over their document workflows. By automating referrals, orders, and medical records, WorldView helps agencies reduce administrative workload, improve compliance readiness, and speed up reimbursements. Agencies using WorldView see an up to 90% reduction in document processing time and orders signed within 7 days, helping teams provide better care with fewer resources.
