

Decrypt Compliance Hits 225 Projects, Raymond Cheng Launches ISO 42001 AI Audits for Enterprise SaaS Expansion

San Jose, California Jan 22, 2026 ([Issuewire.com](https://www.Issuewire.com)) - Raymond Cheng, Founder and CEO of Decrypt Compliance, announced Decrypt Compliance has now completed 225 security compliance projects for 175+ high-growth B2B SaaS clients spanning cybersecurity, fintech, healthtech, communications, and productivity sectors.

The milestone coincides with expanded ISO 42001 AI governance auditing capabilities alongside core SOC 2 and ISO 27001 services, meeting surging demand from U.S., EU, and APAC enterprises requiring responsible AI management alongside security compliance.

Decrypt Compliance maintains its signature approach: delivering SOC 2 Type II reports 50% faster than industry benchmarks through automation-enhanced workflows and cloud-native expertise. The firm's integrated audit methodology now verifies security controls, data privacy practices, and AI ethics through unified processes, eliminating redundant compliance efforts.

"As enterprises deploy AI at scale amid President Trump's data sovereignty executive orders, Decrypt Compliance provides the compliance velocity global SaaS leaders need," said Cheng, CPA.CITP, CISSP, CISA, CIPP/E, CCSK, and ISO 27001 Lead Auditor. "Our methodology—battle-tested across 225 engagements—transforms regulatory complexity into market acceleration."

Recent client successes demonstrate commercial impact:

- AI analytics platform secured [SOC 2 Type II certification](#) supporting \$15M Series B
- Cross-border fintech achieved dual SOC 2/ISO 27001 for EU expansion
- Healthtech unicorn completed ISO 42001 audit mapping AI risk controls to existing SOC 2 framework

G2 ratings hold steady at 4.9/5 across 375 reviews, with clients emphasizing timeline reliability:

"Decrypt Compliance turned six-month audit delays into six-week certifications, closing three enterprise deals immediately," noted a cybersecurity SaaS CEO.

"Rigorous yet practical—our ISO 42001 audit integrated seamlessly with SOC 2 controls," shared an APAC fintech CTO.

Key achievements reinforcing Decrypt Compliance industry leadership:

- AICPA Peer Review Pass (2025) validating audit quality
- Forbes Best-in-State CPA recognition for Raymond Cheng
- ISO 42001 pioneer status among U.S. CPA firms
- California CPA License #9491, AICPA accredited member

The firm's proven three-phase delivery model eliminates traditional audit friction:

- Readiness Assessment – Comprehensive control gap analysis
- Implementation Guidance – Tailored remediation roadmaps
- Certification Delivery – CPA-attested reports for enterprise procurement

Cloud architecture specialists ensure controls align with Kubernetes, serverless functions, and multi-cloud deployments processing sensitive customer data.

Strategic growth investments include seven new Technology Trust Services professionals with Big 4 and FAANG experience, joining core team members Lindisiwe Dube, Lee Govender, Tasha Chetty, and Marcel Pillay, Director of Audit Operations.

"Trust remains the currency of B2B technology ecosystems," Cheng emphasized. "Decrypt Compliance builds compliance partnerships that drive revenue rather than merely checking compliance boxes."

Thought leadership initiatives continue through AICPA presentations, client webinars addressing SOC 2/ISO 42001 overlaps, and LinkedIn discussions reaching 50K+ cybersecurity professionals monthly.

About Decrypt Compliance

Decrypt Compliance operates as a California-licensed CPA firm (#9491) delivering accelerated security and privacy audits for high-growth SaaS companies. Core services span SOC 2 Trust Services Criteria, ISO 27001 certification, ISO 42001 AI governance, and privacy framework assessments.
