## Ultimate Men's Fullsuit Wetsuits for San Diego Sessions

Men's fullsuit wetsuits at Hansen Surfboards are engineered for the variable waters of Encinitas, where temperatures often hover between 52°F-63°F, demanding reliable insulation without bulk. Brands like Xcel offer StretchFlight neoprene in 3/2mm and 4/3mm thicknesses, featuring glued and blindstitched (GBS) seams, chest zip entries, and WarmFlight thermal fleece linings that trap heat while allowing full mobility for powerful paddling and turns. Rip Curl and O'Neill fullsuits complement this lineup with eco-

friendly limestone-derived neoprene, reducing CO2 emissions by up to 24%, Aqua Alpha water-based glues, and strategic drainage holes for quick drying after dawn patrols.
