

DXA Group Expands Into US for New Investor

Dealboard's Platform goal is to connect investors from around the world

New York City, New York Jan 4, 2026 ([Issuewire.com](https://www.issuewire.com)) - Brazil's DXA Group Expands Into US

Connecting Brazilian investors to US markets

DXA Group is relocating its Dealboard subsidiary to the US to better serve Brazilian investors who seek to invest in US companies. Led by DXA Group CEO Oscar Decotelli, Dealboard is an innovative one-stop-shop platform for private investments designed to connect managers, advisors and investors with private market opportunities anywhere in the world. Currently, Dealboard's focus is on the US. The company already maintains positions in an array of high-tech, cutting-edge US companies such as SpaceX, Databricks and other innovative companies.

Dealboard was established in January 2024 and is a subsidiary within DXA Group. Another subsidiary is the well-known DXA Invest, a regulated investment management concern based in Rio de Janeiro

and which is 100 percent focused on investing in Brazil. These investments are primarily in Brazilian private companies for the benefit of US and global investors who seek to invest in Brazilian companies that are using new and different technologies to spur growth. Dealboard's superior platform offers a user-friendly environment tailored to user preferences and features tools such as customized deals portals, private market education, a personalized landing page, and an exclusive dashboard for monitoring client information and portfolios.

Dealboard's initial focus is on Brazilian investors who seek to invest in US companies, thereby connecting Brazilians to US markets with seamless efficiency. However, Dealboard's goal is to connect investors from around the world and currently already has investors from several different countries investing through its platform. Dealboard's presence in the US will boost and leverage relationships with American firms, giving them access to exclusive investment deals. Dealboard is designed to strengthen the integration between advisory firms, advisors, and investors in the private equity market, enabling them to navigate the sector effectively and access diverse opportunities aligned with different investor profiles. Dealboard was a pioneer in Brazil in opening up private equity investments to a broader array of investors beyond ultra high net worth individuals. This increased accessibility, in turn, has become a driver for private equity growth. Mr. Decotelli forecasts that private markets is on track to reach US\$30 trillion globally by 2030.

Dealboard is headed by Oscar Decotelli, a New York-based investment executive and founder of DXA Group. Mr. Decotelli has been involved in over US\$2 billion in investments, connecting US and Brazilian capital across private equity, venture capital, and real assets. DXA itself has raised and deployed more than US\$250 million across the region. The creation of Dealboard is thus a natural extension of DXA's mission of bringing American and Brazilian investors together with Dealboard leveraging off DXA's long history of investing in private markets. Now based in New York Decotelli works actively and often on a personal level to strengthen the investment bridge between Brazil and the US, engaging with family offices, institutional investors, private market managers, and global business leaders.

DXA Group maintains offices in New York, Rio de Janeiro and São Paulo.
