

Eclat Institute Offers Small-Group IP & JC Tuition in Singapore with Flexible Make-Up Lessons (Jurong East & one-north)

Maths, Physics, Chemistry and Biology tuition with max-8 classes, 90-minute weekly lessons, make-up lessons, and after-class WhatsApp support at Jurong East (Vision Exchange) and one-north.

Singapore, Singapore Jan 24, 2026 (Issuewire.com) - [Eclat Institute](#) is a Singapore tuition centre providing small-group tuition programmes for Integrated Programme (IP) and Junior College (JC) students in Maths, Physics, Chemistry and Biology, with make-up lesson options and after-class WhatsApp support.

In-person lessons are held at two locations in Singapore:

- Jurong Centre (Jurong East): 2 Venture Dr, #16-07 Vision Exchange, Singapore 608526
- UClub LaunchPad @ one-north: 67 Ayer Rajah Crescent, #02-14, Singapore 139950

Designed for the fast pace of IP and the demands of the GCE A-Level, Eclat Institute's approach emphasises consistent weekly routines and strong fundamentals. Programme details include:

- **Class size cap:** Each group is capped at **8 students**.
- **Weekly cadence:** Fees cover **4 weekly lessons per month per subject**, with each lesson running **90 minutes**.
- **Tiered monthly fees (per subject):** Early Intake (Oct-Feb) **SGD 360/month**, Regular Intake (Mar-Jun) **SGD 380/month**, Catch-up Intake (Jul-Sep) **SGD 400/month**.
- **Make-up lessons for busy IP schedules:** If a student misses class due to illness or co-curricular activities (CCA) trainings/competitions, they can request a make-up lesson by joining a parallel slot later in the week (and, when available, the following week), subject to slot availability.
- **Between-lesson support:** After-class WhatsApp support for clarification and follow-ups.
- **Teaching approach:** Definition-first lessons and "explain your thinking" checkpoints, so methods start with the why (not just memorising steps).
- **Materials:** IP-paced materials and refreshed school notes to keep fundamentals current.
- **Progress tracking:** Termly diagnostics and clear next-step actions for the student to work on outside class.

For Science students, Eclat Institute also runs practical tuition and lab sessions at partner lab venues where applicable (for example, JC H2 Chemistry Paper 4 routines for titration and qualitative analysis (QA), plus planning, data handling, and evaluation).
