Omnichannel Platform

Secure & Scalable

Data-Driven

Automated Workflows

Singapore, Singapore Jan 21, 2026 (Issuewire.com) - GEVME, an enterprise-focused event technology provider, has enhanced its omnichannel event management capabilities to support organizations managing virtual, hybrid, and in-person events at scale. As businesses increasingly rely on digital and hybrid formats, the need for secure and centralized **event management software** continues to grow.

GEVME provides a unified **SaaS event platform** that enables organizations to manage **online event registration tools**, ticketing workflows, attendee engagement, and **event analytics software** through a single system. The platform is designed to help enterprises streamline event operations while maintaining data security and consistency across multiple event formats.

The solution includes a customizable **event website builder** that allows organizations to create SEO-friendly event pages and deploy **secure event registration** processes. Onsite capabilities such as event check-in solutions, badge printing, and mobile event app integrations support operational efficiency for physical and hybrid events.

GEVME also functions as a comprehensive **virtual event management platform** and **virtual conference platform**, enabling organizations to host digital experiences with integrated content management and audience interaction tools. Built-in **attendee engagement tools** and analytics dashboards provide event teams with actionable insights into participation, content performance, and overall event outcomes.

Designed for enterprise use, the platform incorporates automation and AI-assisted planning features that help organizations optimize workflows, measure return on investment, and improve event planning efficiency. These capabilities support business, marketing, and corporate event teams managing complex event portfolios.

Organizations across Singapore, the United States, and Australia use GEVME to deliver secure, scalable, and data-driven event experiences. Additional information about the platform is available at <https://www.gevme.com/en/>
