

Harrison Global Holdings Acquires ECRUX Venture Partners, Accelerating Global Investment Synergies

Harrison Global Holdings Acquires Korean VC ECRUX Venture Partners, Accelerating Global Investment Synergies(BLMZF)

Seoul, South Korea Jan 14, 2026 ([IssueWire.com](https://www.issuewire.com)) - US-based Harrison Global Holdings, through its subsidiary Blooms Limited, has acquired a 75% stake in ECRUX Venture Partners, a Korean LLC venture capital firm, becoming its majority shareholder.

This acquisition of the Korean VC firm is seen as a strategic move to connect the Korean venture capital market with global capital.

ECRUX Venture Partners is a specialized venture capital firm that manages five funds, including four funded by the Korean government's Mother Fund, totaling approximately KRW 66.5 billion. Its investment experience and deep understanding of the industry span deep tech companies, agri-food ventures, and the cultural content industry.

Through this equity acquisition, Harrison Global Holdings plans to leverage Ecrux Venture Partners' deep understanding of the Korean market and proven investment capabilities. Specifically, it is expected to contribute to enhancing corporate value by identifying outstanding Korean companies with technological prowess and growth potential early on, supporting their entry into the global market, and providing strategic partnerships and follow-up investment opportunities leveraging its overseas network.

Furthermore, Harrison Global Holdings plans to strengthen its joint investment and cross-border investment strategies in promising overseas companies, leveraging Ecrux Venture Partners as a base. This structure is significant in that it can create two-way synergies, not only for Korean companies expanding overseas, but also for global companies entering the Korean market and expanding collaborations.

The market is focusing on the fact that the formal acquisition of Korea's Buncher Capital goes beyond a simple financial investment and is a long-term partnership aimed at expanding into a global investment platform. The combination of Harrison Global Holdings' global capital and network with Icrux Venture Partners' field-focused investment expertise is expected to create new growth opportunities across strategic industries, including deep tech, agro-food, cultural content, AI, bio, healthcare, medical devices, and education.
