

IGP Group Expands Global Presence as a Leading Gasket Exporter from India

Supplying industrial gaskets worldwide including spiral wound gaskets, ring joint gaskets, metallic gaskets, non-metallic gaskets, and custom sealing solutions

Chennai, Tamil Nadu Jan 27, 2026 ([IssueWire.com](https://www.issuewire.com)) - IGP Group, a trusted name in industrial sealing solutions, continues to strengthen its global footprint as a reliable [gasket exporter from India](#), supplying high-quality gaskets to international markets across oil & gas, petrochemical, power, chemical, refinery, and heavy engineering industries.

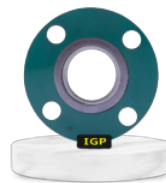

With years of manufacturing expertise and export experience, IGP Group has positioned itself as a dependable [industrial gasket exporter](#), delivering precision-engineered products that meet international quality standards and demanding operating conditions.

As a comprehensive **gasket manufacturer**, IGP Group offers a wide range of sealing [industrial gasket products](#) including **spiral wound gaskets, ring joint gaskets (RTJ gaskets), metallic gaskets, non-metallic gaskets, kammprofile gaskets, and custom-engineered gasket solutions**. Each product is designed to perform under high pressure, extreme temperatures, and critical service environments.

IGP Group [spiral wound gaskets](#) are widely used for high-pressure flange connections, while ring joint

gaskets are preferred for critical oil & gas and refinery applications. The company's metallic gaskets and non-metallic gaskets provide reliable sealing for a variety of industrial systems, ensuring leak prevention and long-term performance.

As an experienced **gasket exporter**, IGP Group follows strict quality control procedures, precision manufacturing processes, and material traceability to ensure consistent product performance. The company supports both standard and custom gasket requirements, catering to OEMs, EPC contractors, plant operators, and industrial maintenance teams worldwide.
