

# Kamloops AI Chatbots Launches Province-Wide Service Across BC With a 30-Day Free Trial and Zero-Risk Setup

Local BC businesses can now capture more leads 24/7 with an AI chatbot that answers pricing and service questions instantly — with no setup fee unless they choose to continue after the trial.

**Kamloops, British Columbia Jan 26, 2026** ([IssueWire.com](http://IssueWire.com)) - Kamloops AI Chatbots has officially launched its AI-powered lead-capture service across the entire province of British Columbia. The company is offering a fully risk-free 30-day trial, allowing businesses to experience automated customer responses and real-time lead capture without paying the standard \$99 setup fee unless they decide to continue.

“Businesses across BC lose potential customers every day simply because nobody is available to respond instantly,” said Tyler, founder of Kamloops AI Chatbots. “Our chatbot solves that by answering basic questions about pricing and services 24/7 and capturing customer details so businesses never miss an opportunity.”

The chatbot is designed to be simple, accurate, and effective. It answers common questions about a business’s pricing and services, collects customer name, email, phone number, and inquiry details, and sends them directly to the business. It does not book appointments or perform advanced tasks — its purpose is to capture leads and provide fast, reliable responses.

Kamloops AI Chatbots emphasizes that even a single captured lead can often cover the entire subscription cost. For many industries, one new customer — whether it’s a contractor job, a salon appointment, a real estate inquiry, or a service call — is worth far more than the monthly fee.

## After the free trial, businesses can choose from three monthly plans:

- Starter Plan — \$99/month, includes 2,500 messages
- Growth Plan — \$249/month, includes 10,000 messages
- Pro Plan — \$499/month, includes 25,000 messages

All plans include 24/7 lead capture, unlimited leads, analytics dashboard access, and the ability to upgrade or downgrade at any time. Additional messages are billed at \$5 per 500 messages. There are no contracts and no hidden fees.

Although founded in Kamloops, the service is available to all businesses across British Columbia, including trades, real estate professionals, restaurants, health and wellness providers, retail shops, and any business that receives customer inquiries online.

Kamloops AI Chatbots is launching with a zero-risk offer: 30 days free, no setup fee unless the business stays, and the ability to cancel at any time. This allows businesses to test the chatbot in real conditions and measure real lead capture results before making a decision.
