

MyTalentPlanner Expands Team with Key Hires and Recent MyTalentPlanner Software Updates

MyTalentPlanner Growth Accelerator System announced new updates to MTP and the addition of Jair Garcia and Lucas Lubinski to the company's team in Green Bay, WI, reinforcing its investment in both product excellence and customer experience.

Green Bay, Wisconsin Jan 19, 2026 ([IssueWire.com](http://www.IssueWire.com)) - MyTalentPlanner Growth Accelerator System announced today that Jair Garcia and Lucas Lubinski have joined the company's team in Green Bay, WI reinforcing its investment in both product excellence and customer experience.

Garcia joins as Lead Software Engineer, bringing practical experience building scalable, easy-to-use software. His focus will be on enhancing the Growth Accelerator System to ensure it reflects how leaders actually plan, develop, execute and adapt to win in today's complex environment.

Lubinski joins as Customer Success Specialist, working closely with customers to ensure they receive hands-on support to receive immediate value as they apply MyTalentPlanner to real organizational challenges. His role underscores the company's commitment to unmatched customer attention—not just technology delivery.

“These additions reflect how seriously we take building software *with* leaders, not just *for* them,” said Steve Van Remortel, Founder and CEO of MyTalentPlanner Growth Accelerator System. “Great tools require great engineering, and real impact requires deep customer partnership. Jair and Lucas strengthen both.”

About Recent MyTalentPlanner Software Updates:

In addition to expanding its team, MyTalentPlanner has recently rolled out a series of significant software enhancements designed to improve usability, insight, and real-world application for leaders and organizations.

The platform now includes **40+ UX/UI improvements**, delivering smoother navigation, improved functionality, and an overall more intuitive user experience.

MyTalentPlanner has also expanded its **metrics and analytics capabilities**, allowing leaders to track performance by **company, department, team member, goal, and meeting**, providing clearer visibility into execution and progress at every level.

To further support customers, the company has enhanced its **live chat support**, enabling faster assistance and smoother in-app navigation.

A major update has been introduced to the AI **Meeting Notetaker**, which now:

- Accurately transcribes meetings word-for-word
- Automatically generates meeting summaries and action plans
- Saves notes and summaries for easy searching
- Allows summaries to be emailed directly to meeting attendees

The platform has also strengthened its **coaching and recommendation engine**, delivering insights based on AI analysis of a company's **strategy, talent, goals, behavioral science, initiatives, and metrics/financials**, helping leaders make better-informed decisions.

MyTalentPlanner recently launched the Toolkit in the platform. The toolkit provides users with best practices/processes for hiring, retention, leadership development, team development, career planning to name a few. In simple terms, providing all the tools and resources needed to master the people-side of the business.

Finally, MyTalentPlanner has expanded its **integration capabilities**, including support for **HRIS systems**, making it easier for organizations to connect MyTalentPlanner with their existing technology ecosystem.
