

Nepali Creative Technologist Dipul Poudel Gains International Recognition Through Independent Research

Young founder and independent researcher active since 2018 earns global digital visibility with IMDb credits and an original theory published on the Open Science Framework.

Kathmandu, Bagmati Jan 23, 2026 ([IssueWire.com](https://www.issuewire.com)) - Dipul Poudel, professionally known as *imdipul*, is a Nepali creative technologist, founder, and independent researcher whose multidisciplinary work spans digital media systems, creative technology, and independent research.

Active since 2018, Poudel founded *imdipul Records*, an independent creative technology label focused on music production, digital publishing, and online distribution. Through sustained independent output, he has earned professional credits on the Internet Movie Database ([IMDb](https://www.imdb.com)) as a writer, composer, and editor for multiple creative projects.

In addition to his creative work, Poudel has conceptualized and published an original theoretical framework titled [Dipul's Loss-Reclamation Priority Theory \(LRPT\)](#) on the Open Science Framework (OSF), a globally recognized open-access research platform. The publication reflects early engagement with abstract reasoning, logical structuring, and independent academic inquiry.

Poudel's technical experience includes web development, digital publishing workflows, and creative systems design. Alongside his independent initiatives, he has contributed to technology coordination and digital communication through leadership and IT roles within **Rotary District 3292 (Nepal & Bhutan)**.

His work has received international digital visibility through platforms such as IMDb, FilmFreeway, Indiefy, PRLog, and EverybodyWiki, positioning him as an emerging creative technologist and independent thinker from Nepal.

Reflecting on his journey, Poudel stated, *"My interest lies in exploring how technology, creativity, and independent research can intersect to create meaningful systems and ideas with global relevance."* As he continues his academic and professional path, Poudel aims to formalize his technical education while expanding his research-driven and creative initiatives internationally.
