Wilmington, North Carolina Jan 26, 2026 (Issuewire.com) - Elsevier, a Dutch academic publishing company that manages the Social Science Research Network, (SSRN), released its latest ranking of authors for article views and downloads.

SSRN had held 15 Gabby Press articles in a non-public, private section of their platform pending further editorial review of the articles.

Prior to the article review, Vass ranked at around 7,000, out of a total global number of 2.5 million authors, on the SSRN platform.

After the review, 14 of the articles were placed into the public section of the SSRN platform, and Vass increased her rank to 6,553, of 2.5 million writers.

One of the 15 articles is still being held for further review. (Creating the Real Estate Special Purpose Entity: The Best Deal Structure for Crowdfunding Real Estate Deals, 2016).

Vass is now ranked in the top .0025% (2/10th of 1%) of all authors on the SSRN platform, with over 50 scholarly articles available for free public access. (<https://ssrn.com/author=831853>)

“I had explained to the SSRN editors that I use SSRN to see how my articles look on the internet, and to gather feedback from other SSRN users. My writing consistently critiques the failures of centralized, corporate-driven global capitalist systems while advocating for decentralized, rights-based market exchange alternative rooted in American founding principles of entrepreneurial individualism.”

Vass is currently writing her 17th book, titled “Entrepreneurial Ethics: Why Tacit Knowledge Is The Best Human Defense Against Corporate Artificial Intelligence,” available at Gabby Press, in late 2026. About Social Science Research Network: SSRN is a repository for preprints devoted to the rapid dissemination of scholarly research in the social sciences. Currently, over 2.5 million scholars around the world publish their articles on SSRN.
