

# Tech YouTuber Granted Geek Interviews OWC CEO Larry O'Connor on AI, Helios S5, and the Future of Upgradable Tech

Tech YouTuber The Granted Geek has released a new long-form interview with Other World Computing (OWC) founder and CEO Larry O'Connor, spotlighting how OWC is fighting to keep modern technology upgradable in an era of planned obsolescence.

**New York City, New York Jan 5, 2026 ([Issuewire.com](http://Issuewire.com))** - In the video, titled “OWC’s Larry O’Connor Talks AI, Helios, and MORE”, O’Connor shares candid insights on how AI is reshaping the tech and media landscape, and why long-term reliability and upgradability remain central to OWC’s design philosophy. He also discusses how products like the Helios S5 PCIe expansion chassis and StudioStack storage solutions give editors, colorists, and other creatives the flexibility to grow their systems without constant full-device replacement.

“Creators shouldn’t have to throw away entire systems just to keep up with new standards,” says Larry O’Connor in the interview, emphasizing OWC’s commitment to sustainable, modular gear that extends the life of existing Macs and PCs. Host Chris Grant Jr. guides the discussion through topics ranging from Thunderbolt-based expansion and pro storage reliability to how AI will influence content creation, post-production workflows, and everyday computing.

The episode positions OWC as a go-to solutions provider for filmmakers, editors, and digital artists seeking high-performance, environmentally conscious hardware that can evolve with their needs over time. Viewers will come away with a clearer understanding of the company’s roadmap, the practical realities of AI in pro environments, and actionable ideas for future-proofing their own setups.

The full interview with Larry O’Connor is now available on Granted Geek with Chris Grant Jr. on
