

A premium seven-seat SUV designed to elevate every journey:

Mitsubishi Motors Middle East & Africa, together with Al Habtoor Motors, launches the All-New Mitsubishi Destinatory in the United Arab Emirates

al-Batrūn, ash-Shamal Feb 11, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Mitsubishi Motors Middle East & Africa (MMMEA), jointly with Al Habtoor Motors, the distributor of Mitsubishi Motors in the United Arab Emirates, has officially launched the all-new Mitsubishi Destinatory—a three-row, seven-seat SUV developed to meet the evolving expectations of Middle Eastern families and modern drivers.

Built around Mitsubishi's strategic proposition, "Grand Destinations Await," the all-new Destinatory marks a confident step forward in the brand's SUV lineup, combining a commanding road presence with refined comfort in a versatile three-row layout.

Commanding Design with a Premium Presence

The all-new Mitsubishi Destinatory's exterior design oozes a unique balance of strength and motion, anchored by the "Gravitas & Dynamism" design concept. The "Gravitas" element ensures an overwhelming presence and solidity, achieved through a road-commanding driver position and the proportions of an upscale, wide-stance SUV. Contrasting this solidity is "Dynamism," which expresses a design bursting with energy and motion. This fusion results in a vehicle that projects SUV toughness while promising the maneuverability to overcome the challenges of the road.

Exterior highlights such as a panoramic sunroof and hands-free tailgate enhance both style and

everyday convenience, while the generous 214 mm of ground clearance ensures confidence on urban roads and in varied driving conditions. The all-new Destinator also features a commanding, large grille, aggressive LED headlights, sculpted bodywork, and 18-inch alloy wheels to ensure the passengers arrive with presence.

Relaxed Luxury for the Entire Family

If there's one area in which Mitsubishi Motors has always excelled, it is cabin design. The interior of the all-new Destinator is no exception. The modern cabin features synthetic leather seating with anti-temperature-rise treatment, dual-zone climate control with dedicated second- and third-row AC ventilation, USB charging points in all rows, and an impressive 25 storage spots.

The dashboard is dominated by a 12.3-inch infotainment display that is compatible with Apple CarPlay and Android Auto, and an eight-inch digital instrument cluster. Other key interior highlights include ambient lighting with 64 customizable colors, an 8-speaker Dynamic Sound Yamaha premium audio system that further elevates the in-cabin atmosphere, a hands-free tailgate, a wireless charger, and a panoramic sunroof operated via Smartphone Display Audio (SDA), ensuring that every journey feels composed and enjoyable.

The flagship SUV provides seating for seven in a classic three-row configuration, complemented by ample storage compartments throughout the cabin. When the second and third rows are folded flat, they reveal an expansive cargo bay ideal for gear, luggage, or larger items.

Advanced Safety for Complete Peace of Mind

On the safety front, Mitsubishi has installed a range of driver-focused technologies and safety features in the Mitsubishi Destinator to provide peace of mind, including a 360-degree digital rearview camera, adaptive cruise control (ACC), Forward Collision Mitigation (FCM), Rear Cross Traffic Alert (RCTA), and Blind-Spot Warning (BSW), among other advanced safety features.

Confident Performance for Every Terrain

At the heart of the all-new Mitsubishi Destinator lies a highly efficient yet powerful 1.5-liter turbo engine, delivering 163 hp and 250 Nm of torque. This powertrain ensures smooth, controlled driving on highways, city roads, and desert routes. The four-cylinder mill is paired with a CVT transmission, sending power to the front wheels.

With Active Yaw Control (AYC) for added stability on slippery and curved roads and five drive modes for confident performance in any conditions, the flagship Destinator is engineered to adapt to every journey—equally ready for demanding workdays and weekend adventures.

Commenting on the occasion, Mr. Junya Takami, the President of Mitsubishi Motors Middle East & Africa (MMMEA), said: "The all-new Destinator is a testament to Mitsubishi Motors' evolution in the Middle East and Africa. We designed this vehicle with a clear vision: to offer a 'Confidence Booster' that elevates the daily lives of energetic families."

The all-new Destinator reflects our deep understanding of what today's families value most—comfort, safety, and a sense of pride in what they drive—because truly, grand destinations await."
