# Free Academic Tools Introduces Free PDF Summarizer and Citation Generator for Students

The new tools are designed to help students and researchers manage academic reading and referencing tasks more efficiently.

Glen Cove, New York Feb 13, 2026 (Issuewire.com**)** - Free Academic Tools, an education technology platform, has announced the launch of two free academic utilities aimed at supporting students and researchers: a **PDF Summarizer** and a **Citation Generator**.

The newly released PDF Summarizer allows users to extract key points and essential insights from lengthy academic documents such as research papers, reports, and study materials. The tool is intended to help users manage large volumes of academic reading more efficiently, particularly during literature reviews and exam preparation.

In addition, the Citation Generator assists users in creating properly formatted academic references. The tool supports commonly used citation styles and is designed to help students accurately attribute sources when referencing books, journal articles, and online academic materials.
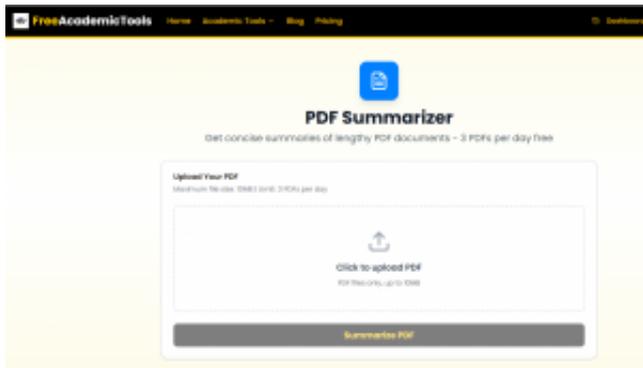

According to Free Academic Tools, the launch addresses common challenges faced by students in organizing academic sources and navigating extensive digital content. Both tools are available online at no cost and can be accessed without paid subscriptions.

The platform focuses on providing practical academic utilities that help users streamline reading and referencing tasks. By offering tools that support summarization and citation formatting, Free Academic Tools aims to assist users in organizing information and improving efficiency during academic research

and study activities.

Free Academic Tools is designed for secondary school students, university learners, postgraduate researchers, and educators across multiple disciplines. The platform focuses on accessibility, ease of use, and alignment with academic standards.
