

GB Enterprises Pvt. Ltd. Celebrates Two Decades of Excellence in Cold Rolled Metal Sections Manufacturing

ISO 9001:2015 Certified Manufacturer Reaches 3,500 MT Monthly Production Capacity, Serving Growing Demands Across India, Middle East, and Southeast Asia

Rohtak, Haryana Feb 5, 2026 ([Issuewire.com](https://www.issuewire.com)) - GB Enterprises Pvt. Ltd., a leading manufacturer of precision cold-rolled metal sections, marks over 20 years of sustained growth and innovation in the metal forming industry. Since its establishment in 2003, the company has evolved from operating a single roll forming machine to managing 40+ advanced machines across a state-of-the-art 165,000 square foot manufacturing facility.

Scaling Production to Meet Market Demands

With a current monthly production capacity of 3,500 metric tons, GB Enterprises has positioned itself as a reliable partner for industries requiring precision-engineered metal sections. The company's ISO 9001:2015 certification underscores its commitment to maintaining international quality management standards across all operations.

"Our journey from a single machine to 40+ units reflects not just our growth, but the trust our clients have placed in us," said Amplus Energy Solutions Pvt. Ltd - Mr. Rahul Bawankar (Senior Manager Procurement) at GB Enterprises Pvt. Ltd. "We've consistently invested in technology and quality systems to meet the evolving needs of diverse industries."

Serving Critical Infrastructure Sectors

GB Enterprises specializes in manufacturing cold-rolled metal sections for four key industry verticals:

- **Solar Structures:** Providing mounting systems and structural components for India's expanding renewable energy sector
- **Pre-Engineered Buildings:** Supplying precision profiles for modern construction solutions
- **MEP Utilities:** Manufacturing specialized sections for mechanical, electrical, and plumbing infrastructure
- **uPVC Steel Reinforcement:** Producing high-precision steel profiles for window and door frame reinforcement

Geographic Expansion and Market Presence

Beyond its strong domestic presence across India, GB Enterprises has successfully expanded operations into the Middle East and Southeast Asian markets. This geographic diversification demonstrates the company's ability to meet varying regional quality standards and specifications while maintaining competitive pricing.

The Middle East market, known for its stringent construction material requirements, has become a significant growth area for the company. Similarly, Southeast Asia's infrastructure development has created substantial demand for reliable cold-rolled metal section suppliers.

Industry Impact and Future Outlook

The cold rolling process employed by GB Enterprises creates metal sections with superior dimensional accuracy and surface finish compared to traditional hot rolling methods. This precision is critical for applications where tight tolerances directly impact installation efficiency and structural integrity.

As India continues its infrastructure modernization and pursues ambitious renewable energy targets, manufacturers like GB Enterprises play a crucial role in the supply chain. The company's production capacity and quality certifications position it well to support major projects across multiple sectors.

About GB Enterprises Pvt. Ltd.

[GB Enterprises Pvt. Ltd.](#) is an ISO 9001:2015 certified manufacturer specializing in cold-rolled metal sections. Established in 2003, the company operates a 165,000 square foot manufacturing facility in Sampla, Haryana, equipped with 40+ roll forming machines. With a monthly production capacity of 3,500 MT, GB Enterprises serves diverse industries including solar structures, pre-engineered buildings, MEP utilities, and uPVC steel reinforcement across India, the Middle East, and Southeast Asia.
