

## GrowthNow Launches as a AI tools Evaluation Platform for AI SaaS tools.

growthnow

**Bengaluru, Karnataka Feb 10, 2026 ([IssueWire.com](http://IssueWire.com))** - **GrowthNow**, a new digital knowledge platform owned and managed by Suventure, has launched in India to help businesses and professionals understand and apply SaaS, automation, and artificial intelligence in practical, real-world scenarios.

GrowthNow was created to address a growing problem faced by modern organizations: rapid

technology adoption without clear guidance. With hundreds of tools entering the market every month, decision makers often struggle to evaluate options, design workflows, and implement systems that deliver measurable value. GrowthNow aims to simplify this process through structured, experience backed content.

The platform functions as a centralized knowledge hub that explains how modern tools fit into actual business processes. Instead of promotional reviews or surface level articles, GrowthNow focuses on clarity, what a tool does, where it should be used, and how it supports execution and growth.

GrowthNow publishes content across key areas including SaaS platforms and business systems, automation and workflow design, practical AI applications, business growth frameworks, and productivity methodologies. Each article is written for non-technical readers while remaining relevant for founders, consultants, and professionals across functions such as marketing, operations, sales, HR, and IT.

A defining feature of GrowthNow is its neutral and practical approach. The platform avoids trend driven narratives and evaluates technology based on usability, integration, and long-term impact. Content is designed to help readers make informed decisions rather than follow hype cycles.

GrowthNow is owned and managed by Suventure, bringing real world experience from technology consulting, software development, analytics, and digital transformation initiatives. This operational background ensures the platform's insights remain grounded and applicable.

GrowthNow is now live and accessible.
