March 17 - 19, 2026

**Alpharetta, Georgia Feb 23, 2026 ([IssueWire.com](https://www.IssueWire.com))** - HobbyScool, an online creative education platform, has announced its upcoming Organized Living Summit, a three-day virtual event taking place March 17–19, 2026. The event is designed to help creative individuals and households develop practical systems for organizing their spaces, supplies, and daily routines.

The Organized Living Summit brings together creative educators to lead structured, approachable sessions focused on sustainable home organization. Workshops are designed for a range of experience levels and emphasize realistic systems that support both creativity and everyday living.

“Creative households often manage multiple projects, materials, and responsibilities at once,” said Dr. Destini Copp, founder of HobbyScool. “This summit focuses on building simple, sustainable systems that make daily life and creative work feel more manageable.”

Workshops at the summit will explore topics such as organizing craft rooms and creative spaces, reducing household clutter, managing ongoing projects, and creating workflows that support consistent creative time.

The Organized Living Summit is fully virtual, allowing participants to join from anywhere. Registration for the event is free, with optional VIP access available for those who want extended content and session replays.

More information about the March 2026 Organized Living Summit, including registration details, is available at:
