

Jiffy Auto Glass Introduces Structured Windshield Protection Programs for Denver and Front Range Drivers

Denver, Colorado Feb 27, 2026 ([IssueWire.com](https://www.issuewire.com)) - Jiffy Auto Glass Introduces Structured Windshield Protection Programs for Denver and Front Range Drivers

Jiffy Auto Glass has announced the launch of two structured windshield protection programs designed to address one of the most common vehicle issues facing Colorado drivers: recurring [rock chip damage](#).

Unlike traditional auto glass warranties that only cover installation defects, these programs provide defined protection against future rock chip damage caused by road debris — a frequent issue across Denver and Colorado’s Front Range.

The launch positions Jiffy Auto Glass among the few auto glass providers in the Denver metro area offering structured post-installation chip protection options.

Addressing Colorado’s Unique Driving Conditions

Colorado roadways create higher exposure to windshield damage due to:

- High-speed interstate corridors including I-25 and C-470
- Ongoing construction zones
- Gravel and debris transport
- Winter sanding and road treatment
- Rapid temperature swings that cause chips to expand

Small rock chips often spread quickly, leading to premature windshield replacement. Jiffy Auto Glass developed these programs to reduce repeat replacement risk and provide long-term cost predictability for drivers.

Two Windshield Protection Options Now Available Jiffy Cares Program – Included With Windshield Replacement

Every paid [windshield replacement](#) now includes one year of protection against eligible future rock chip damage.

The Jiffy Cares Program provides:

- Up to three rock chip repairs or \$150 in total repair value
- Rain-X treatment applied at installation
- Transferable coverage that remains with the vehicle for one year

This structured protection is designed to reduce out-of-pocket repair costs during the first year following replacement.

Lifetime Chip Repair Program – Long-Term Coverage

For drivers who frequently encounter road debris, Jiffy Auto Glass also offers a Lifetime Chip Repair Program available for a one-time purchase.

This program allows ongoing in-shop repairs of eligible rock chips for as long as the vehicle is owned.

It is particularly beneficial for:

- Daily commuters
- Delivery drivers
- Commercial fleet operators
- Drivers traveling high-debris corridors

Repairs must meet safety eligibility standards and are completed by appointment.

Installation Warranty vs. Damage Protection

Jiffy Auto Glass continues to provide a Lifetime Limited Auto Glass Warranty covering workmanship and installation quality.

However, installation warranties do not cover new rock chip damage caused by road debris.

With the introduction of structured protection programs, Jiffy Auto Glass now offers a layered protection model that addresses both installation risk and ongoing damage exposure — a distinction important for Colorado drivers evaluating windshield replacement providers.

Lakewood In-Shop Repair Standard

While windshield replacement services are available via mobile scheduling throughout Denver and surrounding counties, all rock chip repairs covered under the Jiffy Cares and Lifetime Chip Repair Programs must be completed at Jiffy Auto Glass's Lakewood service facility.

Jiffy Auto Glass

7800 W Colfax Ave Unit A
Lakewood, CO 80214
Phone: 303-876-0999

Performing chip repairs in-shop allows technicians to properly evaluate damage, confirm repair eligibility, and maintain structural integrity standards.

This Lakewood location serves as the company's verified anchor facility while supporting drivers across the broader Front Range region.

Service Area Coverage

Jiffy Auto Glass provides windshield replacement, chip repair, ADAS calibration, and protection programs throughout:

Denver County, Jefferson County, Arapahoe County, Adams County, Douglas County, Boulder County, Larimer County, Weld County, and El Paso County.

Major cities served include Denver, Aurora, Lakewood, Centennial, Littleton, Thornton, Arvada, Westminster, Boulder, Longmont, Fort Collins, Loveland, Greeley, Castle Rock, and Colorado Springs.

About Jiffy Auto Glass

Jiffy Auto Glass is a Colorado-based auto glass company specializing in windshield replacement, chip repair, ADAS calibration, car window replacement, and commercial fleet services. The company provides both mobile and in-shop service options and stands behind its work with a Lifetime Limited Auto Glass Warranty.
