

Littleton Hardwood Flooring Company Refines Service Model to Improve Scheduling in Core Markets

Independent Hardwood Floor Company focuses operations on Highlands Ranch and Littleton areas to reduce project timelines and enhance customer experience.

Littleton, Colorado Feb 22, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Independent Hardwood Floor Company, a Littleton-based hardwood flooring specialist with more than 20 years of experience, has announced a refined service approach focused on its core markets of Highlands Ranch and Littleton. The strategic adjustment aims to improve scheduling availability and project turnaround times for homeowners in these communities.

The company will continue serving Castle Rock, Centennial, and Parker while concentrating resources on Highlands Ranch and Littleton, where it has established the strongest client relationships and referral networks. The adjustment allows Independent Hardwood Floor Company to reduce travel time between projects and increase scheduling flexibility for customers in these priority areas.

"After two decades, we know where our best relationships are and which communities we serve most effectively," said Brian Jorgensen, owner of Independent Hardwood Floor Company. "By tightening our

focus, we can give Highlands Ranch and Littleton homeowners faster response times, better availability, and the same quality they've come to expect—without the delays that come from covering too wide an area."

Independent Hardwood Floor Company specializes in hardwood floor installation, repair, and refinishing for residential properties. Jorgensen personally oversees each project, maintaining the hands-on approach that has defined the company's reputation throughout its history. The business has built its client base entirely through referrals and repeat customers, a model that reflects consistent workmanship and direct communication.

The refined service model responds to increased demand in Highlands Ranch and Littleton, where the company has completed hundreds of projects ranging from full-home installations to refinishing original hardwood in mid-century homes. By concentrating operations in these areas, Independent Hardwood Floor Company can offer more predictable project timelines and reduce the scheduling conflicts that occur when serving a broader geographic territory.

The company's approach emphasizes traditional craftsmanship, honest guidance on repair-versus-replacement decisions, and quality materials selected for each project's specific requirements. Homeowners in Highlands Ranch and Littleton can expect improved scheduling options as the company optimizes operations around these core markets.

Independent Hardwood Floor Company will continue accepting projects in Castle Rock, Centennial, and Parker based on scheduling availability and project scope. The company encourages homeowners in all service areas to contact them early for consultation and project planning.

For hardwood flooring services or to schedule a consultation, homeowners can contact Independent Hardwood Floor Company at (303) 907-1737 or visit independenthardwoodfloor.com.
