

# Metalcorten to Showcase Industry-Leading Weathering Steel Innovations and R&D Solutions at BIEMH

Metalcorten, a global leader in the manufacture and distribution of high-performance Corten steel and a flagship brand of Grupo Hierros Etxebarria, announced its participation in the upcoming BIEMH at the Bilbao Exhibition Centre (BEC).

**Bilbao, Vizcaya Feb 16, 2026 (IssueWire.com)** - As the industrial sector moves towards materials that combine aesthetic excellence with structural longevity, **Metalcorten** will present its latest advancements in weathering steel technology, including its proprietary chemical compositions and specialized surface treatment solutions.

As one of Europe's most prestigious industrial showcases, the **BIEMH** represents a critical nexus for the advanced manufacturing sector and the machine-tool industry. This biennial event serves as a premier stage for technological breakthroughs in robotics, digitalization, and additive manufacturing, playing a pivotal role in the global supply chain's evolution. For industry leaders like Metalcorten, the BIEMH is more than an exhibition; it is an essential strategic hub where high-end metallurgy meets large-scale industrial demand, fostering the B2B partnerships that drive the future of smart factories and sustainable infrastructure across international borders.

## Driving the Future of Industrial Steel

With over two decades of expertise, Metalcorten has redefined the standards for **COR-TEN®** and weathering alloys (S355J2WP and HC 315WP). At BIEMH, the company will highlight its R&D-driven approach to steel manufacturing, which focuses on enhancing the characteristic orange copper-tone oxidation while maintaining 100% of the mechanical properties of the base steel.

## Innovation Spotlight: The Calamine Grinding Disc

A key highlight of the exhibit will be Metalcorten's revolutionary **Calamine Grinding Disc**. Developed by their internal R&D department, these specialized polyamide-mix discs allow for the total removal of

surface calamine on black carbon steel without damaging the base material. This innovation ensures a perfectly uniform oxidation process, a critical factor for architects, industrial designers, and large-scale manufacturers.

*"Our presence at BIEMH is a testament to our commitment to the industrial B2B sector," said a spokesperson for Metalcorten. "We don't just supply steel; we provide engineered solutions. From our precision-made tubes and profiles to our specialized surface treatments, we empower our clients to build structures that are both resilient and visually striking."*

## Global Reach, Local Expertise

With dedicated digital platforms and warehouses across Spain, Portugal, France, and the UK, and an export network reaching as far as Mexico and Turkey, Metalcorten is uniquely positioned to handle complex international logistics for large-scale industrial projects, facades, and civil engineering works.

## Visit Metalcorten at BIEMH

Metalcorten invites industry professionals, engineers, and distributors to visit their stand (3G-02) at the Bilbao Exhibition Centre to experience the superior finish of their skiddable steels and consult with their technical team regarding bespoke industrial applications.

## About Metalcorten

Metalcorten (by Grupo Hierros Etxebarria S.L.) is a premier specialist in the manufacture, fabrication, and distribution of Corten steel sheets, tubes, and profiles. Headquartered in Galdakao, Spain, the company serves the global market with high-quality weathering steel, backed by intensive R&D and a robust international supply chain.
