*How Dads Turned Their Babies into Millionaires*

Mickey Doo with Joceli Monera

**Las Vegas, Nevada Feb 2, 2026 (IssueWire.com)** - In honor of Black History Month, author and investor Mickey Dee announces the release of *Baby Knockout Trading Strategy: How Beginner Investors Became Millionaires*, a powerful new book designed to help everyday people—especially within the African American community—build generational wealth through early-trend stock investing.

Mickey Dee, nationally known as the Baby Knockout GOAT, has spent decades teaching investors how to identify small, overlooked microcap companies before they experience explosive growth. In *Baby Knockout Trading Strategy*, he simplifies complex market concepts into practical steps that beginners can follow to participate in wealth creation traditionally closed off to many communities.

The release aligns with Black History Month's legacy of empowerment, economic advancement, and self-determination. Mickey Dee's journey—from journalist to real estate innovator to millionaire investor—demonstrates what is possible when financial education meets opportunity.

*Baby Knockout Trading Strategy* is available now in paperback, hardcover, and Kindle formats.
