Over the past few weeks, multiple [victims](#) have been speaking out about abuse, assault, and misconduct occurring at American Jiu-jitsu gyms.

One Houston area gym also had to take action against a promising professor from Lima, Peru after it was discovered he was having inappropriate relations with a female student, despite having his long term partner work along side him at the gym.

In reflecting on this moment, they said that they recognize that technical skill and rank are not to be valued over character and integrity.

In jiu-jitsu, a black belt must represent more than physical ability. It must represent [values](#), responsibility, and how others are treated.

Unfortunately, in this sport, promotions occur under this type of [leadership](#). This effects students long-term as belt promotions have lineage associated with them, tying the student to the abusive leader for life.

- Hold our leaders to higher standards.
- Ensure complaints are heard.

A healthy gym is built on trust.
