

SAI Conference Announces 2026 Global Machine Learning Conferences Under IntelliSys

IntelliSys 2026 will unite global AI researchers, U.S. institutions, and industry leaders to explore applied artificial intelligence, machine learning innovation, and real-world intelligent systems deployment.

The poster features a purple background with white and light blue text. On the right side, there are two inset images: the top one shows a large audience seated in a conference hall, and the bottom one shows a group of diverse people standing together for a group photo in front of a banner that reads 'Intelligent Systems Conference 2025'.

New York City, New York Feb 15, 2026 (IssueWire.com) - SAI Conference has officially announced its upcoming **Machine Learning Conferences** as part of IntelliSys 2026, scheduled for September 3-4, 2026. The event will gather international researchers, industry practitioners, and U.S.-based AI

innovators to discuss emerging developments in intelligent systems. IntelliSys 2026 is organized by SAI Conference, an international academic conference organizer focused on AI and emerging technologies.

The 2026 edition will focus on applied machine learning, deep learning architectures, explainable AI, and responsible deployment of intelligent systems. With a structured peer-review process and curated keynote sessions, the conference aims to create meaningful collaboration between academia and industry.

According to the organizing committee, the initiative is designed to accelerate real-world ML applications across sectors including healthcare analytics, cybersecurity, and financial modeling.

“IntelliSys has always prioritized research depth and practical relevance,” said a spokesperson for SAI Conference. “Our goal is to provide a trusted global forum where innovation is both challenged and refined.”

The event is expected to attract strong participation from U.S. universities, research institutions, and AI-focused enterprises.
