

Scale2Miami.com Partners with Pynn.ai and AngelHive.io to Transform Startup Selection and Investor Access with AI

They are redefining how founders get discovered, evaluated and funded in a single intelligent ecosystem.

Palma, Balears Feb 14, 2026 (IssueWire.com) - Scale2Miami.com, Pynn.ai, and AngelHive.io today announced a strategic collaboration that redefines how startups are selected, evaluated, and connected to investors, eliminating friction, duplication, and bias from the global accelerator ecosystem.

Through this partnership, Scale2Miami.com leverages Pynn's powerful white-label AI platform to analyse and manage applications for its upcoming Miami cohort, while simultaneously giving startups long-term value beyond the program itself.

AI-Powered Selection. Investor-Ready Startups.

Scale2Miami.com now operates on Pynn's full-stack AI infrastructure, allowing the team to:

- Analyse startup applications with structured, data-driven AI insights
- Generate comprehensive strengths-and-weaknesses reports
- Manage evaluation through integrated CRM and voting systems
- Coordinate events, service providers and mentors within one platform

- Provide each startup with a dynamic, reusable digital profile

Every startup accepted, and even those not selected, receives its own AI-powered profile and evaluation report. These reports are not just internal selection documents; they are investor-ready assets founders can use immediately.

One Profile. Unlimited Opportunities.

For founders, this marks a fundamental shift. Instead of repeatedly filling out similar applications for every accelerator, VC or innovation program, startups create **one profile, one time** inside the Pynn.ai ecosystem.

From there, they can:

- Apply to any of Pynn's 30+ white-label partners worldwide
- Instantly sync their data to new programs
- Share professional evaluation reports with potential investors
- Continuously update their progress

From Private Evaluation to Public Marketplace

Startups on the Pynn.ai platform can choose to publish their profile to AngelHive.io, the public-facing marketplace designed for investor discovery.

On AngelHive.io:

- Investors register for free and browse curated startup profiles
- Startups create accounts for free and receive a professional one-pager
- Full AI-generated deep-dive reports are available for €29
- Reports clearly outline strengths, risks, and growth potential

The result is unprecedented transparency, which allows investors to gain structured insight and founders gain credibility.

Proven Traction at Scale

Pynn.ai has already:

- Secured 30+ white-label clients, including accelerators, VCs, corporations, government programs, and event organisers
- Analysed more than 2,000 startups in the past six months alone
- Built an integrated ecosystem including CRM, voting systems, event planning tools, service provider directories, and a private/public marketplace

This partnership with Scale2Miami.com demonstrates how accelerators can dramatically increase efficiency while providing measurable, lasting value to founders.

A New Standard for the Global Startup Ecosystem

"Accelerators should empower founders beyond the cohort itself," says Etienne Gillard, Head of

Ventures of Mana Tech and driving force behind Scale2Miami.com. "With Pynn.ai and AngelHive.io, we're not just selecting startups, we're equipping them with investor-grade intelligence and lifelong access to opportunity."

By merging AI-driven evaluation, reusable digital identity, and open investor access, Scale2Miami.com, Pynn.ai and AngelHive.io are establishing a new global standard:

Smarter selection. Stronger startups. Seamless capital access.

About Scale2Miami.com

Scale2Miami.com, a Mana Tech initiative, is a fully funded market-entry and early-stage investment program designed to help international founders land and scale in Miami.

About Pynn.ai

Pynn.ai is a white-label AI evaluation and dealflow management platform serving accelerators, venture capital firms, corporations, and public innovation programs worldwide.

About AngelHive.io

AngelHive.io is the public startup marketplace powered by Pynn.ai, connecting founders and investors through structured AI-driven insights.
