

STEAM Group and Spirit of Math Partner to Bring the Spirit of Math Contest to Guatemala

North York, Ontario Feb 18, 2026 ([IssueWire.com](https://www.issuewire.com)) - [STEAM Group](#) and [Spirit of Math](#) are thrilled to announce an exciting collaboration that will bring the International Spirit of Math Contest to Guatemala for the 2025-26 school year.

The partnership is a continuation of Spirit of Math's unwavering commitment to promote co-operation, inspire confidence and release the genius in every child all around the world. This collaboration will give Guatemalan students the opportunity to showcase their abilities on an international stage, while growing their confidence and skills which they will need for future success.

"At Spirit of Math, we are dedicated to revolutionizing education for students everywhere," said Kim Langen. "We are excited to support STEAM Group in their mission to cultivate young talent and help students realize their greatest potential."

About STEAM Group

STEAM Group is a Guatemalan organization dedicated to transforming education through the integration of STEAM-based pedagogical approaches. For more than a decade, they have worked in close collaboration with educational institutions, teachers, companies, and national and international organizations, impacting thousands of students and educators across the country.

One of their main initiatives is the STEAM Robotics program, a structured curricular proposal spanning from pre-primary to upper secondary level. It integrates educational robotics, block-based and text-based programming, artificial intelligence, and digital simulators.

In addition, they are the official representative in Guatemala of the World Robot Olympiad (WRO), one of the most important student robotics competitions in the world, through which Guatemala has maintained a consistent presence on international stages.

With a clear national vision, they work to ensure that education, technology, and innovation move forward hand in hand in building sustainable opportunities, fostering young talent, and positioning Guatemala as a regional leader in STEAM education.

The partnership is one of many collaborations Spirit of Math is undertaking with international organizations to bring the International Spirit of Math Contest to every corner of the world. Competitive events such as these offer children an excellent opportunity to develop important skills such as analysis, problem solving and critical thinking. They also get the personal satisfaction (and motivational boost) of tackling and conquering some of the hardest questions.

About Spirit of Math

For over 30 years, Spirit of Math has been an innovative leader in education for high-performing students, with more than 30 campuses across the globe. From in-person and online classes, camps and workshops to an expanding series of workbooks and training for educators, Spirit of Math is changing

the equation for inquisitive minds around the world. Spirit of Math's four elements – Core Curriculum, Drills, Problem Solving and Collaborative Group Work – form the foundation of all its programs. These building blocks are the basis of a multi-layered experience that creates well-rounded students with an intensive toolkit of skills, logical problem-solving and higher-level collaborative capabilities.
