

# The Expert Marketplace for Buying and Selling Used Mobile Cranes Above 30 Tons

TrustedCranes specializes in fully brokered B2B transactions for used mobile cranes — Liebherr, Tadano, Demag, Grove, Terex, Sany, XCMG — with seller privacy protection and access to off-market inventory.

**Dresden, Sachsen Feb 26, 2026 ([IssueWire.com](https://www.issuewire.com))** - The global market for used mobile cranes above 30 metric tons runs on expert knowledge. Knowing whether a 2018 Liebherr LTM 1060-3.1 is priced correctly requires crane-specific expertise. Evaluating a Tadano ATF 130G-6 against a Grove GMK 5130-2 for a specific project requires technical depth. Connecting the right buyer with the right seller — discreetly and professionally — requires a brokerage approach that general equipment platforms simply cannot offer.

TrustedCranes was built specifically for this market, by people who understand it.

## WHAT TRUSTEDCRANES IS — AND WHAT IT IS NOT

TrustedCranes is a specialized B2B marketplace and brokerage service for used mobile cranes above

30 metric tons. The platform is not a general equipment marketplace. It does not list excavators, forklifts, or aerial work platforms. It handles one category exclusively: mobile cranes — all-terrain cranes, truck-mounted cranes, rough-terrain cranes — from the world's seven leading manufacturers:

- Liebherr (LTM all-terrain, LTF truck-mounted, LRT rough-terrain)
- Tadano (ATF and GR series, including former Demag-branded models)
- Demag (AC all-terrain series)
- Grove (GMK all-terrain, RT rough-terrain)
- Terex (AC all-terrain, RT rough-terrain)
- Sany (STC series)
- XCMG (XCT series)

This specialization is not a limitation — it is the platform's core value. When a crane fleet operator needs to sell a GMK 6300L or source a specific LTM configuration, they are dealing with brokers who know exactly what those designations mean.

## HOW TRUSTEDCRANES WORKS: FULLY BROKERED TRANSACTIONS

TrustedCranes does not enable direct contact between buyers and sellers. Every inquiry, every qualification step, and every communication is handled by the platform's expert broker team — in German and English.

This model was chosen deliberately for a market where transactions are high-value (typically €80,000 to €2,000,000), where both parties often operate in the same industry and may be future partners or competitors, and where fraud — advance payment scams, misrepresented technical condition — is a documented risk in cross-border deals.

By acting as a professional intermediary throughout the entire process, TrustedCranes protects both sides:

**Sellers:** Company identity and fleet details remain private until the seller actively chooses to proceed with a specific buyer. All photos are processed with AI-powered image anonymization that removes logos, fleet numbers, and identifying markings before publication.

**Buyers:** All listings are reviewed by the broker team before going live. Buyers interact with verified, documented inventory — not anonymous private ads.

## THE OFF-MARKET LAYER: CRANES THAT ARE NEVER PUBLICLY LISTED

Many crane owners are willing to sell under the right conditions — but not willing to publish a listing. Competitors would see it. Clients would ask questions. The timing might not be right for a public announcement.

TrustedCranes offers off-market registration for exactly this situation. Sellers register their crane confidentially — model, specifications, condition, target price. The broker team matches this private inventory against active buyer search requests. When there is a genuine fit, the broker contacts both parties and facilitates the introduction.

For buyers, this means access to mobile cranes that exist nowhere else on the market.

Buyers can submit detailed search requests specifying manufacturer, lift capacity, boom configuration, year range, geographic preference, and budget. These requests are continuously matched against both public listings and the off-market inventory.

## WHO USES TRUSTEDCRANES

**Sellers:** Construction companies, crane rental companies, and fleet operators across Europe, the Middle East, and Asia who need to sell used mobile cranes discreetly — reaching qualified international buyers without public exposure or fleet transparency.

**Buyers:** International equipment buyers, infrastructure project developers, and crane operators looking for specific mobile crane models with technical documentation, cross-border transaction safety, and access to inventory that is not findable through standard marketplace searches.

**Geographic reach:** Germany, Austria, Switzerland, Netherlands, Belgium, Poland, Czech Republic, Turkey, United Arab Emirates, Saudi Arabia, India, and buyers across Asia and Southeast Asia.

## ABOUT TRUSTEDCRANES

TrustedCranes is a B2B marketplace and brokerage service for used mobile cranes above 30 metric tons, headquartered in Dresden, Germany. The platform combines specialist crane market expertise with modern digital infrastructure — AI image processing, multilingual listings in German and English, structured inquiry management, and off-market inventory matching — to serve construction companies, crane operators, and equipment traders worldwide.
